REPORT

OF THE

Minister of Education

FOR THE YEAR 1940

TO THE HONOURABLE ALBERT MATTHEWS, LL.D.,
Lieutenant-Governor of the Province of Ontario.

YOUR HONOUR,—

I beg leave to present to your Honour the Report of the Department of Education for the year 1940.

Schools and the War

The vocational schools of Ontario were mobilized during the last two weeks of June, 1940, for the purpose of training men and women for semi-skilled employment in war industries. A survey was made in each district of the needs of local firms, and special war emergency classes were instituted to provide the necessary instruction. Staffs, accommodation and equipment showed an amazing adaptability to war-time requirements. During July and August approximately 6,000 persons throughout the Province received special training in a variety of trades, and so successful was the project that plans are now being made to continue the instruction concurrently with the regular day and evening classes. If necessary, the war classes will be conducted on a twenty-four-hour-day basis.

The programme in its entirety has been made possible by the whole-hearted co-operation of advisory committees and boards, who placed the accommodation, equipment and staff under their control at the disposal of the Department without reserve. This spontaneous co-operation on their part is gratefully acknowledged.

New Courses of Study and New Text-Books

In order that the programme of studies should not be unduly disrupted and that the cost of the new text-books required should be as light as possible in any one year, it is the policy of the Department of Education to introduce new courses of study for Grades IX-XIII in successive years.

A new course for the pupils of Grade XI in Ancient and Mediaeval History was introduced in September, 1940, and a new text-book to cover this course was authorized at that time, viz., *The Ancient and Mediaeval World*. This, with a Latin Reader for High Schools, and a new reader, *Deuxième Livre de Lecture*, for the use of elementary schools attended by French-speaking pupils, were the only new text-books authorized for 1940 which pupils were required to purchase.

The following books were authorized but permission was granted to schools to continue the use of text-books already in the hands of the pupils: English—*Mastering Effective English* for Grade XII; History—*Britain and the Empire from 1603*; *Britain's Story*; *The British People, A Story of Social Development*; these are alternative texts for Grade IX. *A Modern Geometry for High Schools* was also authorized.

General Shop Work, was authorized but pupils were not required by Departmental Regulations to purchase it.

Teacher Training

The registration at the Normal Schools decreased from 1,247 in 1939-40 to 1,120 in the 1940-41 session. The actual decrease in attendance is to be ascribed to the entrance of 104 fewer men, the majority of whom enlisted for active service or engaged in some form of war work. Women graduates from upper secondary school grades are likewise responding in ever increasing numbers to a growing demand for inspectors in munition plants, clerks in the national civil service, trainees in the nursing profession and workers in other war-time activities. Thus an anticipated increase in the numbers of teachers-in-training as a consequence of the better remuneration now being paid throughout the profession did not take place and this in spite of the fact that 104 applicants who held but 8 of the 9 required Upper School examinations were by special ruling admitted in 1940-41 to the Normal Schools. This year the Province has had to deal with a shortage of approximately 150 teachers. The gaps in supply have been filled, and usually well filled, by former teachers now married, but who patriotically gave their services to meet a war-time need. The temporary closing of 198 small schools during the past five years, under the policy pursued by the Department of closing schools having an average attendance of 8 or under, has helped materially in averting a crisis in educational affairs owing to the present scarcity of qualified teachers.

During the autumn of 1940 a questionnaire was addressed to all inspectors requesting a detailed report on the work of 1939-40 graduates from the Normal Schools. The results show that the all-round efficiency of this recent group of teachers-in-training is appreciably above the average for teachers newly entering the profession particularly with regard to managerial capability. Improvement in this latter respect may probably be attributed to: (1) the introduction on the Normal School programme of four weeks of continuous directed-observation and practice teaching, two in graded and two in ungraded schools, which has given the students a more intimate understanding of actual schoolroom conditions and a more realistic practice in the discharge of their duties, (2) the substitution of "one-hour-in-charge" for the single practice lesson in rural practice-schools, (3) the interchange of Normal School masters and inspectors which has given the former a more thorough acquaintance with the field for which teachers-in-training are being prepared and the latter a better appreciation of the need and ways and means of continuing teacher training.

Closing of Small Schools

The number of qualified teachers available for the schools decreased rapidly during the year, due to enlistment of male teachers, to the marriage of many women teachers, and to the transfer of many women teachers to office work, particularly under the Dominion Government. It became a distinct advantage, therefore, to have some thirty-eight rural public schools, with an enrolment of fewer than eight in each case, closed during the calendar year. In most cases

these schools were closed by the action of the local board of trustees. In a few cases, however, it was necessary for the Department to ask the boards of trustees that the schools be closed temporarily because there was no prospect of an enrolment of more than eight pupils for the school in the immediate future.

At the end of the year 1940, 198 such small schools had been closed.

Township School Areas

As the ratepayers receive further information regarding township school areas, favourable opinion toward these areas increases. The public school inspectors have rendered a splendid service in bringing to the attention of the people the advantages to be gained by the larger unit of school administration in rural areas. The number of new areas formed in the calendar year 1940 was not as great as for each of the preceding two years. This was due largely to war conditions and to the hesitancy on the part of the people to make changes at this time. Twenty-six new areas were formed during the period January 1st to June 30th, 1940, involving the dissolution of 139 school sections. There are now 99 Township School Areas in the province, representing 513 former school sections.

Improvement of Rural School Buildings and Grounds

In the early part of 1940 an Interdepartmental Committee was formed to discuss ways and means of bringing about improvement and beautification of school properties.

The Inspector of Agricultural Classes prepared a booklet entitled "Suggestions for Improvement of Rural School Grounds", which was distributed to inspectors and teachers throughout the province. In the latter part of the year much good work had been done in many parts of the province toward improvement and beautification of school property. This campaign will be made continuous in the hope that, through the co-operation of inspectors, trustees, teachers parents and children, the school properties may become much more attractive than they have been in the past.

Boards of Trustees are not being called upon to make large expenditures in connection with this beautification programme. The plan is rather to make use of the efforts of the pupils and local residents, and of planting material to be found in the local area, as far as possible.

Correspondence Courses

The Correspondence Courses conducted by the Department brought to a close a very successful year in June, 1940. Children in many more isolated homes took advantage of this excellent opportunity to carry on their education in their own homes. Wherever there are mailing facilities these courses are available, free of charge. Over 60,000 prepared lessons were received during the school year. Not only are isolated children provided with these courses, but also crippled children, children in the sanatoria and preventoria of the province, and even Ontario families temporarily domiciled outside the Province, may take advantage of these courses.

In numerous homes, particularly where the children receive judicious supervision, most satisfactory work is done and excellent progress made. During the year under review, over 500 pupils passed from one grade to the next, some even completing two grades in one year.

Many pupils enrol during the winter months, i.e., from November to Easter, when conditions of roads or weather render it difficult for them to attend school. If at the time of their enrolment the teacher gives the pupil a statement of his

progress he may continue his studies with little or no interruption and return to his school the equal, and in many cases in advance, of his classmates.

Correspondence pupils have been exceptionally successful at the Entrance Examinations, particularly those who had taken all the grades by correspondence. From the very first they had been taught to put their work down orderly and neatly. Thus the Entrance was but a final Correspondence exercise.

In Grades IX and X the results were quite satisfactory. Many completed the usual quota of four or five subjects during the year. Some who had not so much time to devote to study, or were not encouraged to apply themselves regularly, did not do so well. But whatever progress they did make, might be continued in September without interruption.

At Christmas and Easter supplementary reading books, suitable to the different grades, were given to pupils who showed satisfactory progress or earnest endeavour.

Grades VII to X were provided on the 1st and 15th of each month with outlines of the chief events of the present war.

The Correspondence Staff consists of nineteen fully qualified and experienced teachers, thirteen of whom are permanently employed; and six were temporarily employed whenever their services were required.

Respectfully submitted,

D. McARTHUR,

Minister of Education.

Toronto, November 21st, 1941.

APPENDIX A

REPORT OF THE CHIEF INSPECTOR OF PUBLIC AND SEPARATE SCHOOLS

The Provincial Inspectoral Staff, 1940

I. IN MEMORIAM:

Mr. Neil McDougall, B.A., was the son of a pioneer family in Lambton County who resided on a farm near the town of Petrolia. His early education was received in rural schools, the Petrolia High School and the Sarnia Collegiate Institute. When only seventeen years of age he began teaching, on a Model School certificate, in a rural school. After an experience of three years he entered the University of Toronto, graduating with honours in the Natural Sciences and in General Proficiency. He then attended the Ontario School of Pedagogy, and served on the staffs of the Pembroke High School, the Port Dover High School and the Parkhill High School. In the last-named school he served with marked success as principal for a period of ten years. In 1907 he was appointed Public School Inspector for Lambton East, a position which he held with distinction until 1922. His enthusiasm, his inspiration and his counsel were appreciated by his teachers. In 1922 he received the appointment as General Inspector in the Department of Education. While with the Department he directed the Correspondence Courses, of which he and his staff of teachers made a great success. At the time of his retirement no fewer than two thousand boys and girls living in remote areas in the province were taking advantage of these courses, and all these pupils regarded Mr. McDougall as an interested friend and adviser. He was also for a number of years Interchange Officer for the Department of Education, and through his efforts on their behalf many teachers of Ontario schools were privileged to spend a year abroad in the schools of the United Kingdom or of the other Dominions. Education in this province lost an active worker and a benefactor in the death of Mr. McDougall in December, 1940.

Mr. H. Frank Cook, B.A., was born in the village of Delhi, Norfolk County. His public school education was received in School Section No. 6 Windham, his high school education in the Simcoe High School and his professional training in the Simcoe Model School and in the Ontario Normal College in Hamilton. He graduated from the University of Toronto in 1899 with First Class honours in the Natural Sciences and with the gold medal for General Proficiency. He taught public school for eight years, part of the time in School Section No. 15 Charlotteville, and the balance in School Section No. 3 Middleton. As an inspector he served six years as assistant to Dr. Wadsworth, Inspector of Schools for Norfolk County, succeeding him in 1905. This position he held until his death in March, 1940. Mr. Cook's services as an inspector covered a period of approximately forty years, and under his able leadership the schools made marked progress. Mr. Cook was also a leader in community work. He took a very keen interest in every movement of benefit to Simcoe and the district. He was particularly well-versed in the history of Norfolk County and was often called upon to speak on this topic. In more recent years he became interested in the organization of classes in English for New Canadians in his area. This

work met with great favour. Mr. Cook was a scholar, but he combined with scholarship a sound judgment and a sympathetic understanding which endeared him to his teachers and to a large circle of friends.

Mr. Charles W. Mulloy was born on a farm near the town of Elmira. His public school education was received in the home section, and his high school education in the Berlin (Kitchener) High School, from which he graduated with a non-professional Second Class certificate. At the conclusion of a course in the Toronto Normal School he obtained a Second Class Teacher's certificate (Grade A). He taught for several years in rural schools in the Counties of Wellington and Waterloo. During these years he prepared by private study to take his Honour Matriculation examination, and on it he obtained honours in Classics, Mathematics, English and French, and also a scholarship for General Proficiency. He graduated from the University of Toronto in 1884 with Specialist academic standing in Classics. After qualifying as a high school teacher, Mr. Mulloy taught as an assistant master in the following schools:—Waterloo County Model School, Galt; Berlin High School; Seaforth High School; and as principal in Grimsby High School, Lucan High School and Aurora High School. In 1906 he was appointed Public School Inspector for the northern portion of York County. This position he held until his retirement in 1928. Mr. Mulloy was a successful teacher, and as an inspector he rendered outstanding service for a period of twenty-three years. Mr. Mulloy died at his home in Aurora on October 2nd, 1940.

Dr. J. H. Putman retired from service as Chief Inspector of the Ottawa Public Schools in 1937, after serving in this capacity for a period of twenty-seven years. On September 12th, 1940, following a brief illness, he died at his home in Ottawa. Dr. Putman was born in Gainsborough Township, Lincoln County, on September 17th, 1866. He attended a rural public school in the home area and later the Smithville High School and the St. Catharines Collegiate Institute. He graduated from the Toronto Normal School with honours, and throughout his teaching experience continued to be a keen student. In 1899 he obtained his B.A. degree from Queen's University and in 1907 his Bachelor of Pedagogy degree, and in 1910 his Doctor of Pedagogy degree from the same University. Few teachers had a more rapid rise in the profession than Dr. Putman. In 1885 and 1886 he taught in a rural public school in Seneca Township; from 1888 to 1891 he was principal of the Ancaster Village Public School; he was on the staff of the John Fisher Public School in the City of Toronto from 1891 to 1894, and in the latter year became Assistant Principal of the Ottawa Normal Model School. In 1902 he became Headmaster of the Normal Model School and in 1908 the English Master. In 1910 he received the appointment of Public School Inspector in the city of Ottawa. In this position his work became widely known throughout the Province and the Dominion. His annual reports on the public schools of Ottawa were regarded as outstanding contributions to the cause of elementary education in the province, and were read widely by educational leaders. During his period of office in Ottawa Dr. Putman received many appointments on educational committees, chief among these being (1) as chairman of a committee to report on the educational system of British Columbia; (2) as a member of a committee to report on the Protestant schools of the Province of Quebec; and (3) as one of the first members of the Ontario Teachers' and Inspectors' Superannuation Commission. In 1935 Dr. Putman was honoured by the University of Toronto with the degree of LL.D. On retirement from office as Chief Inspector of the Ottawa Public Schools he was elected

as a Controller in the City of Ottawa and was giving leadership in this new field up to the time of his final illness.

As a writer Dr. Putman contributed many articles to educational publications. His book on Egerton Ryerson is to be found in the best school libraries of the Province and the Dominion, and his work entitled "Fifty Years at School" is a comprehensive review of the changing school philosophies and school practices over the period 1890 to 1940. With due deference to all, it may be said that, in the field of elementary education, Dr. Putman stood second to none in the Dominion during the last twenty-five years of his active service.

Mr. J. H. Smith, B.A., was a native of Ancaster. On graduating from the St. Thomas Model School he entered the teaching profession at the early age of seventeen, his first school being at Teviotdale. Later he attended the Ottawa Normal School and obtained a Second Class certificate. For a number of years he was engaged in public school work in the Counties of Wellington, Perth, Elgin and Middlesex, at the same time taking an extra-mural course in Science at Queen's University. He attended Queen's for one year and graduated with an M.A. degree in Science. He then accepted a position as Science Master in the Ridgeway Collegiate Institute, and later was appointed principal. Owing to uncertain health, Mr. Smith resigned this position to engage in farming. Subsequently he returned to his profession and held the principalships of the Petrolia and Dutton High Schools. In 1907 he was appointed Public School Inspector for Kent West and the City of Chatham. After 1928 his duties were confined to the inspectorate of Kent West; he retired on August 31st, 1931. From boyhood Mr. Smith was a keen naturalist and few men knew birds and flowers as well as he. He was one of the founders of the Kent Nature Club. He was also an active member of the Macaulay Club and for a number of years was the honorary president of the club as well as its popular critic. To every task which Mr. Smith undertook he brought enthusiasm, good judgment and exceptional tact. He was an outstanding inspector and was held in high esteem by his teachers as well as by his large circle of friends.

II. RESIGNATIONS:

Mr. W. J. Lee, B.A., is a native of Lanark County. He attended school in School Section No. 15 Bathurst, and later the Perth Collegiate Institute, obtaining a Second Class non-professional certificate in July, 1885. He attended the Perth Model School and had his first experience as a teacher in the Sturgeon Falls Separate School, beginning January, 1886. He also taught in the Perth Separate School and in School Section No. 2 Burgess North. On completing a course in the Ottawa Normal School he was appointed to the staff of the Ottawa Separate Schools as principal of St. Joseph's School, a position which he held with distinction for twenty-four years. In 1915 he was appointed Separate School Inspector for Western and Central Ontario, his duties taking him to Bruce County on the West and to Hastings County on the East. In January, 1922, he became the senior Separate School Inspector for the City of Toronto, and he held this position until his retirement on August 31st, 1940. He was an outstanding teacher and a very efficient inspector, possessing those qualities of personality which commanded the admiration and respect of the teachers and pupils. His official visits to the schools were always awaited with interest and pleasure by both staffs and students. His ready acceptance of new ideas in education was expressed in his enthusiasm for the new programme of studies.

Throughout a teaching service of fifty-five years Mr. Lee made a noteworthy contribution to the interests of the elementary schools of the province.

Dr. D. D. MacDonald, B.A., is a native of Durham County. His elementary school education was received in Union School Section No. 22 Clarke and School Section No. 22 Darlington, and his secondary school education in the Bowmanville High School. He obtained his B.A. degree from the University of Western Ontario, and his Doctor of Pedagogy degree from the University of Toronto in 1923. Dr. MacDonald attended the Port Hope Model School and the Toronto Normal School. He taught in rural public schools in School Section No. 4 Darlington and School Section No. 5 Pickering. Later he became vice-principal, and then principal, of Annette Street Public School, Toronto. Later still he served as principal of Niagara Street, McMurrich and Orde Street Public Schools. In September, 1930, he was appointed a Public School Inspector for the City of Toronto. He filled this position with distinction until his retirement on June 30th, 1940. During his years of service in the public schools of Toronto Dr. MacDonald was appointed a delegate to attend the first biennial meeting of the World Federation of Education, which was held in Edinburgh in 1925. On his invitation the Federation held its meetings in Toronto in 1927. He also attended meetings of the Federation in Geneva in 1929, in Honolulu in 1932, in Dublin in 1933 and in Tokio, Japan, in 1937. Few teachers and inspectors have rendered a greater service to the cause of elementary education in Ontario than Dr. MacDonald.

Mr. J. F. McGuire, M.A., is a native of the County of Leeds, in which he received his elementary and secondary school education, the latter in the High Schools of Athens and Brockville. Upon obtaining his Second Class certificate from the Ottawa Normal School he spent several years teaching in his home county. In 1902 he graduated from Queen's University with his Master of Arts degree and the medal in Biology. He secured his High School Assistant's certificate, and Specialist's certificate in Science, from the Ontario Normal College in 1903, after which he taught in the High Schools in Almonte and Iroquois and in Brockville Collegiate Institute. In 1915 he assumed the duties of Public School Inspector in the Counties of Leeds and Grenville. In December, 1940, he retired from active service. During his tenure as inspector Mr. McGuire took special interest in the establishment of continuation schools for the benefit of rural school pupils. For eight years he was Examiner-in-Chief in Science for the Department of Education. In 1933-34 he filled the place of exchange teacher in the Hamilton Normal School. Mr. McGuire secured the ready co-operation of teachers and boards of trustees in all school matters, and under his direction his schools made splendid progress. He was regarded as an educational leader, not only in his local area but also throughout the province.

Mr. S. A. Morrison, B.A., first attended school in School Section No. 8 Bentinck, Grey County, from which he obtained a non-professional Third Class Teacher's certificate. He then attended the Walkerton Model School and taught for three years in School Section No. 5 Bentinck. Later he attended the Owen Sound Collegiate Institute. He then entered Queen's University, specializing in English, History and Political Science; he graduated in all three courses, with honours in English and in History. After a year's attendance at the Ontario Normal College, Hamilton, he was awarded a High School Specialist's certificate in English and History, and a Permanent First Class Public School certificate. In addition to his public school teaching experience Mr. Morrison taught in the Barrie Collegiate Institute as Master in English and History, and as principal of

the High Schools of Markdale and Elmira. In 1927 he was appointed Public School Inspector for Grey East. In this inspectorate he rendered valuable service to the cause of education, and also to the community generally; he supported enthusiastically every movement which he considered would benefit the pupils and the people of his area. He was one of the first of the inspectors to emphasize the teaching of music in his schools, and at the time of his retirement in June, 1940, no fewer than 99 schools in his inspectorate were receiving special instruction in music.

III. APPOINTMENTS:

The following appointments were made to the provincial staff of inspectors during the year 1940:—

1. St. Catharines: Mr. M. F. Pummell, B.A., B.Paed., Principal of Marlborough Public School, Windsor, duties beginning July 4th, 1940.
2. Essex: Mr. F. W. Minkler, B.A., B.Paed., of the staff of the Ontario College of Education, duties beginning June 1st, 1940.
3. Grey East: Mr. L. L. Sinclair, B.A., Principal of Strathcona Public School, Owen Sound, duties beginning September 1st, 1940.
4. District Division X: Mr. H. W. Brown, B.A., Principal of Wellington Continuation and Consolidated School, duties beginning September 1st, 1940. (New inspectorate.)
5. District Division XI: Mr. J. E. Horton, B.A., Principal of Central Public School, Cochrane, duties beginning September 1st, 1940.
6. R.C.S.S. Division III: Dr. Louis Charbonneau, M.A., Editor of French Text Books, duties beginning October 5th, 1940. (New inspectorate.)
7. R.C.S.S. Division VIII: Mr. A. M. McNamara, B.A., of the staff of the Ontario School for the Blind, Brantford, duties beginning October 1st, 1940. (New inspectorate.)
8. R.C.S.S. Division XIV: Mr. W. A. Hayden, M.A., of the staff of Lisgar Collegiate Institute, Ottawa, duties beginning September 1st, 1940.

V. EXCHANGES BETWEEN INSPECTORS AND NORMAL SCHOOL MASTERS, DATING FROM SEPTEMBER 1ST, 1940.

1. Mr. C. F. Cannon, B.A., B.Paed., (York 6), with Mr. R. A. Johnston, B.A., B.Paed., of the Toronto Normal School.
2. Mr. C. B. Routley, M.A., (Wentworth), with Mr. H. G. Lockett, M.A., B.Paed., of the Hamilton Normal School.

VI. ENLISTMENT FOR MILITARY SERVICE:

Mr. H. H. Langford, B.A., Public School Inspector for District Division X, with residence at Kirkland Lake, enlisted with the Royal Canadian Air Force on February 12th, 1940. On completing the Instructors' Course at Trenton, Ontario, he was transferred to Camp Borden to act as Flying Instructor in the Advanced Training Squadron of the British Commonwealth Air Training Plan. Mr. Langford holds the rank of Flight-Lieutenant.

Township School Areas

The increase in the number of these larger units was not as great during 1940 as for each of the preceding two years. This was due, no doubt, to a greater hesitancy on the part of rural people to entertain changes during the war period. The inspectors continued, however, to make the idea more widely known, and among municipal councillors, trustees and rural leaders a favourable attitude to the movement is steadily growing. Twenty-six new areas were formed during the period January 1st to June 30th, 1940. There are now in the province 99 of these larger areas, replacing 513 school sections. An encouraging feature of the progress made in 1940 was that in seven areas formed in earlier years, additional school sections were added.

The following is a list of the township school areas organized during the calendar year 1940:—

Townships	Number of School Sections	County or District	Inspector	Date of Formation
1. Perry.....	7	Parry Sound	E. R. Underhill	Jan. 8th
2. Wollaston.....	6	Hastings	J. D. Deyell	Jan. 10th
3. McClure and Wicklow.....	4	Hastings	J. D. Deyell	Feb. 24th
4. Bangor.....	3	Hastings	J. D. Deyell	Feb. 24th
5. Casey.....	2	Temiskaming	W. L. Lovell	May 13th
6. Clarendon.....	7	Frontenac	T. J. Thompson	May 28th
7. Mayo.....	4	Hastings	J. D. Deyell	June 1st
8. Olden.....	6	Frontenac	T. J. Thompson	June 1st
9. Widdifield.....	6	Nipissing	J. W. Trusler	June 3rd
10. Elzevir.....	7	Hastings	A. W. McGuire	June 3rd

24. Monteagle and Herschel (2).....	7	Hastings	J. D. Deyell	June 29th
25. Fredericksburgh North.....	7	Lennox	K. O. Birkin	June 29th
26. Dungannon.....	7	Hastings	J. D. Deyell	June 29th

Small Schools

Thirty-eight rural public schools with enrolment of fewer than eight pupils each were closed during the calendar year 1940, either by action of the local

board of trustees or at the request of the Minister of Education. The total number of such schools remaining closed temporarily, at the end of the year 1940, was 198.

The schools closed during 1940 are given below:—

School	Inspectorate	Inspector
1. S.S. No. 12 Sullivan.....	Bruce East.....	J. M. Game
2. S.S. No. 5 Huron.....	Bruce West.....	G. C. Dobson
3. S.S. No. 8 Huron.....	Bruce West.....	G. C. Dobson
4. S.S. No. 9 Goulburn.....	Carleton.....	T. P. Maxwell
5. S.S. No. 1 Garafraxa E.....	Dufferin.....	H. A. Halbert
6. U.S.S. No. 10 Garafraxa E.....	Dufferin.....	H. A. Halbert

Improvement of Rural School Buildings and Rural School Sites

Early in 1940 a movement was begun leading to the improvement of rural school buildings and school sites. A committee was formed under the chairmanship of Mr. J. A. Carroll, B.S.A., Department of Agriculture. This committee

included representatives from the Department of Education, the Department of Agriculture, the Ontario Agricultural College and the Department of Lands and Forests. The aim of the committee was to institute a constant and continuous campaign, through the Public and Separate School Inspectors and the teachers, for improvement and beautification of school buildings and school sites. During the year 1940 considerable progress was made. Each inspector, with the co-operation of the local board of trustees, selected a particular school on a provincial highway to become a demonstration and exhibition school from the stand-points of improvement and beautification. The inspectors further urged upon all teachers and trustees to take steps toward the improvement of their school properties.

Under the chairmanship of Mr. Norman Davies, B.S.A., Inspector of Agricultural Classes in the Department of Education, a sub-committee of the main committee prepared a booklet entitled "Suggestions for Improvement of Rural School Grounds." This booklet was distributed to every school in the province in September, 1940. It is hoped that a rapid improvement may be made in school properties over the next two or three years, and more particularly in those school properties which border on provincial highways. The Forestry Branch of the Department of Lands and Forests is assisting the schools in securing trees and shrubs. Mr. John F. Clark, Lecturer in the Horticultural Societies Branch of the Department of Agriculture, is giving special attention to the beautification of school grounds.

It is realized that to get the best results there will require to be hearty co-operation among all those interested in the schools, and that Departmental officials, inspectors and teachers will require to give this project their unwavering attention and encouragement.

Fifth Classes (Grades IX and X)

Since the introduction of the new programme of studies into the elementary schools the Department has ceased to encourage the organization of fifth classes in the ungraded school. It is felt that the responsibilities which are to be assumed by the teacher of a one-roomed school in presenting the new courses for Grades I to VIII inclusive are quite sufficient for him to undertake, without the additional effort which is required when the courses for Grades IX and X are included in the daily programme of work. As a result of this attitude of the Department toward fifth classes in ungraded schools, the number of these classes organized since 1937 has become fewer year by year, as the following table shows:—

	1937	1938	1939	1940
No. of fifth classes	1,715	1,521	1,452	1,370
No. of fifth class pupils	11,621	10,914	9,811	10,987
Grants to fifth classes	\$70,366	\$69,083	\$62,536	\$67,352

In lieu of the organization of fifth classes the Department is encouraging the transportation to secondary schools of rural pupils who have high school entrance standing. The regulations require that two or more rural school boards arrange together for the transportation of high school pupils from the several school sections, to a continuation school, a high school or a vocational school. If the agreement is approved by the Department, the approval depending on the distance to be travelled, the daily cost of transportation and whether or not the contractor has met the requirements under The Ontario Public Vehicle Act,

the Department pays to each section that is a party to a contract sixty per cent of the net cost of the transportation to that section. (For the school year 1941-42 the grant will be only fifty per cent of the net cost to each section.) In the school year 1940-41, 71 rural school sections took advantage of the assistance given.

The School on Wheels

The Railway School Car, with its Union Jack flying from the flag-pole at each point of call, presents a striking feature in the northern landscape. This unique type of school answers the inarticulate call of the wilderness child for help. Without it, he had no hope for even the rudiments of an education. Now he profits by this welcome visitor and is forging ahead to take his place among his more favoured fellow-Canadians. A large percentage of the population served is of non-English speech, but the language handicap is but a slight obstacle to progress, and these pupils and their parents are fitting themselves readily into the pattern of loyal and effective citizenship.

As a proof of the efficiency of the School Car, eighteen pupils last year were taking secondary school work and seven more were added to the list as High School Entrance graduates. This "Work Your Own Way" system of education develops initiative and self-dependence which register not only in school but in afterlife.

The car accommodation has been steadily improved since inauguration in 1926. In 1940 a new car was installed to replace one of the oldest in service. This car, now operating west of Capreol on the Canadian National lines, is the last word in workmanship, comfort and convenience, and has earned the grateful appreciation of teacher, parents and pupils, as well as the commendation of the public at large.

Interchange of Teachers

The gravity of the present world situation has affected the interchange of teachers to a considerable extent. For the school year 1940-1 only eleven Ontario teachers are on exchange, as compared with more than forty during each of the past several years. Except in the case of two teachers who remained overseas for a second year, the exchanges are all with the Western Provinces. A summary of the exchanges arranged for the school year 1940-41 is given below:—

- 1 Ontario Public School teacher on exchange in England
- 1 Ontario Separate School teacher on exchange in Scotland
- 4 Ontario Public School teachers on exchange in British Columbia
- 1 Ontario Public School teacher on exchange in Alberta
- 2 Ontario Public School teachers on exchange in Saskatchewan
- 2 Ontario Secondary School teachers on exchange in Alberta

11 Ontario teachers on exchange during 1940-41.

Consolidated Schools

The key principle in the consolidation of schools is the central school in the rural municipality or school area, with carefully planned transportation thereto. By this system certain distinct advantages are gained: e.g. consistently regular and prompt attendance, better qualified and more permanent teachers, improved accommodation and equipment, more effective inspectorial supervision and better local administration. An outstanding advantage is the opportunity afforded the pupil of continuing his education while he remains at home. Out of the twenty-eight consolidated schools in the province twenty-four have fifth classes and continuation school work, with an enrolment of 500 pupils

1. The Railway Car School in its winter quarters.

3. The Classroom in Action.

2. The Kitchen.

4. The Living-room.

5. Arthur and David build a winter home at Car School Siding to get an Education.

The system has been in operation since 1908, when Hudson Township in Northern Ontario chose to try out the central school and transportation in preference to multiplying isolated sectional schools. Since that time these twenty-eight consolidated schools have replaced seventy-nine sectional and village schools, thus bringing to the rural child the advantages of the well-manned and organized graded school while retaining the rural atmosphere and providing a programme adjusted to rural needs.

Trends in the Salaries of Elementary School Teachers
(cities not included) **From 1900-1940**

1900-1910: At the beginning of this period Canada was emerging from a depression and salaries were low. An aggressive immigration policy, initiated in the closing years of the nineteenth century, increased the number and size of settlements in the Prairie Provinces, creating a demand for additional schools and teachers, many of whom were enlisted from Ontario. In 1907 and 1908, 46 of the 56 Model Schools were closed, and the academic requirement for entrance to a training school was raised to a Second Class certificate. Economic conditions improved during the period, and, as a result of these favourable conditions, the average salary of rural men teachers advanced, more or less uniformly, from \$349.00 to \$508.00, and the average salary for women teachers advanced uniformly from \$255.00 to \$431.00, a percentage increase in the former of 45 and in the latter of 70.

1910-1920: The trend of salaries during this decade was continuously upward, the rise from 1917 to 1920 being of a very decided character. For the first four years of the period the momentum acquired in the previous decade carried the salaries upward. For two years after the outbreak of the Great War the upward trend deviated little from the horizontal, but, as war orders stepped up the circulation of currency, economic conditions, which improved materially, were reflected generally in higher wages, higher profits and higher prices of commodities. During the decade the average salary of teachers advanced in the case of men teachers from \$508.00 to \$1,059.00, a percentage increase of 108, and in the case of women teachers from \$431.00 to \$868.00, a percentage increase of 100.

1920-1930: The trend of teachers' salaries in this decade was upward, but only to a minor degree. A reaction to the boom conditions of the later years of the former decade came in the early portion of the period, but it was followed by an extensively active period to almost the closing years of the decade. The increase in the average salary of men teachers rose only 13 per cent. during the ten years, and only 16 per cent. in the case of women teachers.

1930-1940: A very severe economic depression followed the active conditions in business of the former decades, which did not spend its force until about the close of the year 1934. As a consequence, teachers' salaries dropped drastically during the period 1930 to 1936. The decrease in the salaries of the men teachers was 38 per cent., and in the salaries of women teachers the percentage decrease was 55. The decrease was accentuated by percentage reductions in the legislative and township grants, and by a surplus in the supply of teachers. The graph here attached indicates a gradual increase in the salaries from 1936 to 1940. Improvement in economic conditions, the raising of the standard for teachers' certificates, reducing the supply of teachers, the increasing of the grants on teachers' salaries, together with the sane efforts of teachers' federations, stemmed the downward trend. The second world war is a contributing factor in the movement for a general advance in the standards of wages

and salaries. In this decade the average salary of men teachers declined from \$1,200.00 to \$875.00, or 31 per cent., while the salary of women teachers declined from \$1,000.00 to \$740.00, a percentage of 26. The same general influences

TREND IN PUBLIC SCHOOL TEACHERS' SALARIES, 1900 to 1940

Average Town Salaries have been chosen as a fair indication of the Trend of Urban Salaries in comparison with Rural Salaries.

which were responsible for the upward and downward trends of salaries for rural teachers have also been operative in the case of teachers in towns and villages. The graph which appears on this page represents the trends in the salaries of teachers in rural and in urban schools of towns and villages for the period 1900 to 1940.

Elementary Teachers—Supply and Demand

At the present time there are approximately 17,500 teachers in the elementary (public and separate) schools of the province. During and at the end of the school year September 1939—June 1940 there were 1,713 teachers who left the elementary teaching profession of the province either temporarily or permanently. A survey made with the help of the Public and Separate School Inspectors of the province shows that these teachers left the profession for the following reasons, and in numbers as indicated:—

(1) Enlistment for war service.....	148
(2) For other war work.....	51
(3) Due to marriage.....	882
(4) Due to change of occupation.....	183
(5) To attend University.....	41
(6) To attend a teacher-training school for higher qualifications.....	16
(7) To teach in secondary schools.....	27
(8) To teach in private schools.....	15
(9) Due to poor health.....	63
(10) Due to death.....	28
(11) Released by boards due to unsatisfactory service.....	51
(12) Due to superannuation.....	119
(13) Due to other reasons.....	89

These numbers may be regarded as normal except with respect to (1) and (3).

In June, 1940, there were 1,095 teachers who graduated from the eight Normal Schools.

The conclusion to be reached from the above statistics is that the number entering the profession did not keep pace with the number leaving it. However, there had been an accumulating over-supply of qualified teachers during the years, approximately, 1930 to 1937. This over-supply has been dwindling for the past three years, and it may be said now that there is a definite shortage of qualified elementary teachers in the province. Since September 1st, 1940, it has been found necessary to grant provisional standing for one year to 37 teachers not holding Ontario qualifications.

There are 1,111 teachers-in-training now in the provincial Normal Schools. The inspectors, after careful enquiry, find that there are a number of married women teachers who, because of the enlistment of their husbands for active war service, will be returning to the teaching profession temporarily. A few others who are qualified will return to the teaching profession for a period. Notwithstanding these facts, there will be an increased shortage of elementary teachers in September, 1941, and if enrolments in the Normal Schools do not increase by a considerable number during the next two or three years, there will continue to be a serious shortage of elementary teachers.

School Health Supervision

More than accustomed interest in the extension of school health supervision to rural and small urban communities has been shown during the last year. Probably the most constructive approach to this problem was evidenced by the Oxford County Council, who petitioned the Government for the legislation to permit of the expenditure of county funds for the employment of school nurses. Such legislation being secured, the necessary arrangements were completed and the Council, through a duly appointed sub-committee of its membership, arranged with the interested municipalities whereby school nursing personnel would be made available without charge to the community. The claims of the proponents of the scheme have, in one year, been accepted by its most lukewarm adherents.

Another approach has been adopted by the Council of the County of Bruce, whereby an annual grant of \$10.00 per classroom is made available to any municipality, or combination of school boards, interested in the establishment of an acceptable type of school health service.

A similar manifestation of concern on the part of taxing bodies in the physical well-being of school-age children, particularly in times of national emergency as critical as those through which we are at the moment passing, is strongly recommended to other County Councils.

The Teachers' Library

On February 15th, 1938, the Department of Education opened a Teachers' Library in the Travelling Libraries Branch of the Department of Education. At first books were made available to rural public and separate school teachers only. Early in 1940 the library was made available to all public and separate school teachers with the exception of those in the largest urban centres.

In spite of the fact that the library service was made known to all rural teachers through the Public and Separate School Inspectors, the demand for books on the part of the teachers was very disappointing over the first two-year period. Recently, however, the number of teachers using the library has been

increasing rapidly. There were 1,359 elementary school teachers who made use of the library during the year 1940. This was an increase of 457 over 1939. The circulation is steadily increasing, the increase in number of volumes loaned during 1940 as compared with 1939 being 1,945. At the end of the calendar year 1940 the library contained some 982 volumes, involving 81 titles. The latest books relating to elementary school practice are constantly being added to the collection.

In order to become a member of the Teachers' Library an elementary teacher is merely required to write in for an application card. When the card is properly filled in and returned to the Teachers' Library, Department of Education, the teacher may at once secure the library service. Each teacher is allowed only one book at a time, and may retain the book for a period of three weeks. If the book has not been asked for at the end of the three weeks, the period of loan may be extended. A fine of two cents per day is charged for overdue books. There is no other charge, however, connected with the library service, the postage being paid both ways by the Department of Education.

School Exhibits at the Canadian National Exhibition

Over the past few years exhibits have been made by certain groups of schools at the Canadian National Exhibition. Each year some seven to ten inspectors have been asked to appoint a committee of teachers representative of their inspectorates, for the purpose of selecting and arranging the exhibit. The Department has given encouragement to the movement by paying the necessary expenses connected with the transportation of the exhibits to Toronto and returning them again to the schools.

At the Exhibition of 1940 splendid exhibits were made by the Toronto Public Schools, the Toronto Separate Schools, the York Township Public Schools, the East York Township Public Schools, the Kitchener Public and Separate Schools, and also by the following inspectorates:—

Bruce East: Inspector J. M. Game, B.A., B.Paed.

Northumberland & Durham (2): Inspector A. A. Martin, B.A., B.Paed.

Simcoe East: Inspector J. A. Gibson, B.A., B.Paed.

Simcoe South: Inspector C. A. Lapp, B.A., B.Paed.

Welland; Lincoln: Inspector W. A. Marshall, B.A., B.Paed.

District Division IV: Inspector W. J. Judd, B.A.

District Division XII: Inspector J. W. Trusler, B.A.

No better exemplification of the work of the schools under the new programmes of study could have been given than was shown in these exhibits.

Conclusion

The continuance of the war has had its effect upon the schools. As indicated in an earlier part of this report many male teachers enlisted for active service, and during the year 1940 an unusually large number of women teachers left the teaching profession to be married.

Inspectors and teachers co-operated with boards of trustees in having the schools aid in many phases of war work during the year. The Junior Red Cross groups in the schools provided much in both money and materials. At the end of the year the pupils everywhere were purchasing War Savings Stamps and Certificates. In November and December the Navy League campaign through the elementary schools resulted in a total of \$25,202.93 being contributed by the

elementary school pupils for the purposes of the League. There was also a hearty co-operation as between the Daughters of the Empire and the schools in many areas. In some cases the pupils and teachers joined forces in collecting for the purchase of such special war items as ambulances, planes, etc. Many schools became interested in the British War Victims' Fund and made liberal contributions to it.

The Department of Education found it necessary during the year to ask the inspectors to perform additional services, to make special reports and surveys and to offer comments and recommendations on school problems and policies, to a greater extent than in any previous year. The prompt, willing and splendid response of the inspectors was fully appreciated. The work of the schools each year depends greatly on the tactful and inspirational leadership given by the inspectors, and it may be stated without reserve that during the year 1940 the inspectors excelled in their efforts leading to improvement in the work done by the elementary schools.

V. K. GREER,

Chief Inspector of Public and Separate Schools.

Toronto, March 31st, 1941.

APPENDIX B

REPORT OF THE CHIEF INSPECTOR OF SECONDARY SCHOOLS

I have the honour to submit herewith the reports of the High and Continuation School Inspectors and the Director of Vocational Education, for the school year 1939-40.

G. F. ROGERS,
Chief Inspector of Secondary Schools.

Toronto, August 22nd, 1941.

1. Report of the Inspectors of High and Continuation Schools

The first year of the Second World War has left a deep imprint on the secondary schools of Ontario. The effect upon pupil enrolment and number of teachers employed was not immediately apparent for in both respects the totals were higher than in the previous year. This year's total of 83,150 pupils was 1,037 in excess of that in 1938-39 and the total of 3,331 teachers represented an increase of 161. But as the year advanced attendance declined owing to the enlistment of older pupils and to their absorption into industry. An increasing number of teachers also joined the fighting forces. In addition, the war necessitated the adoption of measures of economy. It brought to an end the expansion of school plants to provide facilities for training in the practical courses of Shop Work and Home Economics. A number of summer courses were discontinued in the summer of 1940. The war also had its effect upon the activities of all schools. Junior Red Cross Societies were organized and patriotic activities of many kinds were promoted under the direction of teachers so that all pupils might have an opportunity to share in the war effort. Furthermore, the foundations of our democratic society and the principles which should govern international relations have been examined afresh and it is to the enduring credit of the teachers that they have successfully fostered a sound attitude towards these matters in a time of national peril.

The new courses of study for Grade XI were introduced with the exception of those in Geography and Ancient and Medieval History. Following the practice already established in the grades of the Lower School, twenty per cent. of the school day was set aside for the study of English. In Mathematics (Algebra, Geometry), Science (Physics, Chemistry) and Agriculture (Part I, Part II), a choice of procedure was offered: one part might be completed in Grade XI and the other in Grade XII, or both parts might be begun in Grade XI and completed the following year. The new courses were taught during the year with interest and gratifying success and it is fitting that the part played by teachers in the achievement of these desirable results should be gratefully acknowledged.

The year was also marked by the abolition of all Departmental papers in Middle School subjects. The responsibility of granting or of withholding standing was placed in the hands of the principal and teachers of each school. Though this has added to their responsibilities, it has also given a new freedom in the treatment of a considerable part of the work in the various subjects. The interests

and aptitudes of classes, conditions peculiar to a particular part of the province, and other circumstances can now be permitted to exert a larger influence on the presentation of the various subjects than was formerly the case when a uniform examination necessitated close adherence to a common body of information.

The abolition of Departmental examinations also resulted in a marked increase in the number of private schools requesting inspection, so that they too might be able to recommend their pupils for a Departmental diploma in Middle School subjects. To meet these new demands, Mr. T. Kennedy, M.A., and Mr. C. W. Robb, B.A., were added to the High School inspectoral staff. Both men had won distinction as teachers and principals, chiefly in Toronto schools. Mr. Kennedy was formerly principal of Riverdale Collegiate Institute and later of Oakwood Collegiate Institute; Mr. Robb of Lawrence Park Collegiate Institute, of which he was the first principal. The scholarship and practical experience of both men make their services of particular value to the Department of Education.

One of the gratifying developments in recent years has been the increasing frequency with which School Boards or their representatives have conferred with inspectors at the conclusion of the annual inspection. Communities have been well served by Boards whose members have investigated the new courses with care and understanding and who have given evidence of their approval by providing the means to make possible their effective presentation. The Department of Education has also sought to make inspectoral visits of greater value by arranging for inspection of the larger schools by two inspectors whose teaching experience has been in different departments, as, for example, Mathematics and English. It is felt that by this method a more exact appraisement of the work being done can be made and that teachers have a better opportunity to discuss the special problems of their departments with inspectors conversant with their work through practical experience.

In conclusion, we desire to pay tribute to the ability and enthusiasm of the teachers who have entered the profession during the year and to the scholarship and devotion of those teachers who have retired from the profession at the conclusion of many years of successful service.

2. Report of the Director of Vocational Education, 1939-40

In contrast with the Great War of 1914-18, the outbreak of hostilities in September 1939 was destined to have far-reaching effects upon the activities of vocational schools and the character of the future student body. In the first Great War there was no demand for the mechanized equipment inseparable from the present conflict, and the conduct of the schools was little disturbed except by voluntary enlistments from the staff. At the present time there is every indi-

cation that the technical schools will be required to play an important part in the prosecution of the war.

The school year closed at a time when the need for skilled and semi-skilled labour was beginning to cause embarrassment to many firms which had received contracts for war munitions and supplies. Unable to recruit personnel with sufficient skill to meet the urgent demand of industry, the Dominion Government made representations to the various provincial departments of Labour, and the Ontario Department of Labour, in turn, appealed for assistance to the Minister of Education. The Minister responded, with the full co-operation of local school boards, by throwing all the facilities of the technical schools wide open to provide the special training required.

Although the scheme to give men and women special training to fit them for war work was not brought into actual operation until the close of the school year, and did not materially affect the school programme until the period covered by my next report, the valuable work accomplished by the schools during the vacation period justifies a brief description in this year's review.

It is on record that during the holiday months of July and August 1940, when the valuable shop accommodation and equipment of the vocational schools would ordinarily remain unused, thousands of men and some hundreds of women were given an intensive course of training to fit them for jobs in the factories and work shops. The course for men included instruction in bench metal practice and fitting, sheet metal work, general machine shop practice, machine operating, acetylene and electric welding, and the ancillary blueprint reading and mathematics. The women (mostly sponsored) received specialized instruction in light machine work and welding as required by their sponsors. Approximately 90% of the trainees were absorbed by industry on completion of the courses.

So successful was the training project that, at the expiration of the summer classes, the Federal Government requested that the effort be continued throughout the winter months, and, with the consent of the Minister of Education, these special war classes became an accepted part of the technical school programme, superimposed upon the routine of the regular day and evening curriculum. In some cases schools were operated during the entire twenty-four hours of each day and the pressure on the shops staff almost reached the breaking point. The physical strain was so great that it became necessary to appoint additional instructors, without professional training, to meet the situation. Tribute should be paid to the shop directors and teachers for their encouraging support and also to the school boards which so loyally co-operated in making the plan a success.

My next report will deal more extensively with the progress of the work as the scheme developed, and the administrative changes which became necessary as new problems evolved.

Regular Vocational Day and Evening Classes

With war time requirements in view, the subjects and time tables of the full time day school courses, which had previously been revised to bring Grade IX work in vocational schools in line with the course applicable to all types of secondary schools, were slightly modified to permit of the inclusion of as much shop work as possible. In Grades X, XI and XII, the number of options allowed in four distinct courses, (a) industrial shop work and agriculture, (b) home

economics, (c) commercial, and (d) art, permitted a wide diversification of instruction to meet individual needs and aptitudes. In schools where matriculation courses are offered to prepare students for admission to university faculties of engineering, commerce or household science, the Grade XIII course for high schools is followed, the only variation being that, in accordance with arrangements made with the universities, the shop work, draughting and special arithmetic of the technical schools, and the practical subjects of the commercial and home economics courses are substituted for the Latin option.

In the composite schools where academic and vocational courses are offered in the same building, considerable advantage accrues to the pupils of Grade IX by reason of the fact that all receive their practical instruction from the skilled trade teachers of the vocational staff who are "journeyman" mechanics in their own right. This instruction, taken in conjunction with the general shop work and home economics courses provided in high schools and continuation schools, constitutes the most effective type of vocational guidance yet devised. Principals should recognize and seize the exceptional opportunity afforded by these new courses to observe and record the aptitudes of the pupils with a view to directing the boys and girls into the proper channels for higher education or in preparation for future employment as mechanics, homemakers, or on the farms.

The general shop and home economics courses, as distinct from the vocational courses, are dealt with more fully in a later paragraph.

New Buildings

Ottawa—The new technical school is now functioning smoothly under the able supervision of Principal Wallen. Already there is considerable discussion of utilizing the shops for war work.

Toronto—The additional accommodation and alterations in the Danforth Technical School, which were completed last summer, have largely relieved the congestion in this school. The Department's share of the cost was paid in cash.

Simcoe—The vocational addition to the Simcoe High School was completed in time for the opening of the school in September 1939. It provided a new metal working shop, wood shop and finishing room, as well as a sewing room and home economics room with adjoining store room, and two agricultural laboratories with greenhouse and storage facilities. The accommodation previously provided in the old building for agriculture and home economics now supplies additional classrooms for the use of the overcrowded academic departments.

Kirkland Lake—This school has been obliged to extend its accommodation during the year to provide additional classrooms, a library, and science and art rooms. Even with this additional space, it is believed that the growth of the school will necessitate further extension in the near future, probably for additional shops.

Evening Classes

The work of the evening classes has been somewhat curtailed through the discontinuance in some schools of what may be termed "hobby classes". However, the registration of adults in these classes, as shown in the comparative statement accompanying this report, indicates widespread interest on the part of employed adults. The main object of these courses, which is to assist manual workers to increase their skill and earning power, is constantly kept in mind. Close inspection guarantees quality and practicality in the character of instruction and justifies the substantial grants-in-aid provided by the regulations.

A Home Economics Classroom

Shop Work

General Shop and Home Economics Courses in Secondary Schools

A review of these special courses which were introduced for the first time in 1937-38 indicates increasing enthusiasm on the part of school boards for this practical outlet for the students in districts where there are no vocational schools. During the past year, 116 secondary schools and fifth classes participated in the generous grants provided towards accommodation, equipment and maintenance.

The problem of securing a sufficient number of suitable teachers as shop instructors is gradually being eliminated through the provision of summer courses to qualify for the elementary types of certificate and the one-year course made available at the Ontario Training College for Technical Teachers in Hamilton for the intermediate certificate which is required by full-time instructors. Regulations and syllabuses of instruction have been issued with the object of facilitating the means by which academic teachers may adapt themselves to the new requirements. Provision along similar lines has been made to insure a supply of home economics teachers, both through summer courses and a one-year course at the Ontario College of Education. The main objectives of the courses were outlined in my report of last year.

Home Economics and Manual Training in Public and Separate Schools

The Vocational Branch of the Department is responsible, not only for the supervision and inspection of general shop work and home economics in the secondary schools, but also for what is termed manual training and home economics in the public and separate schools. These two subjects are optional.

Separate regulations govern the teaching of these subjects in Grades VII and VIII, and urban school boards which are unable to comply with the general regulations are permitted to establish centres under the special provisions applicable to rural schools. On the other hand, certain large rural areas have been designated as urban centres and required to comply with urban standards. Departmental inspectors are responsible for the establishment, organization and inspection of the urban centres, while the local school inspectors control the work of the rural schools. During 1939-40, 160 manual training centres and 168 home economics centres were operated under the urban scheme and grants totalling approximately \$97,000 were paid. The inspectors are seeking to improve the instructional value of the projects which in some cases are too elementary. Under the rural scheme, 409 schools participated, earning grants approximating \$56,000. Fifteen thousand dollars of this grant was a contribution of 50% towards the cost of approved equipment. This represents an expenditure by school boards of \$30,000 to provide the necessary tools, benches and cupboards, and shows a keen interest on the part of those responsible for the rural primary schools in the potentialities of manual work as a preparation for the mental development of the children.

Comparative statistics for vocational schools and departments are as follows:

	1922-23	1938-39	1939-40
Number of Schools—Day.....	16	62	62
" " " —Evening.....	51	52	48
Number of Pupils—Day.....	9,402	38,157	36,502
" " " —Evening.....	35,511	36,481	34,983
Number of Teachers—Day.....	337	1,605	1,632
" " " —Evening.....	1,097	1,096	1,081
Government Grants.....	\$638,217	\$1,189,627	\$1,289,444
Municipal Expenditure (Net).....	\$1,233,397	\$4,590,613	\$4,595,902

The adaptability of the vocational schools in time of crisis has been well demonstrated in recent months during which our nation has been transformed into a gigantic war machine. The demand of industry for semi-skilled workers has greatly impressed those responsible for vocational training and caused them to facilitate the extension of this training to all persons willing to serve in the production of the necessary materials to insure victory.

F. S. RUTHERFORD,
Director of Vocational Education.

Toronto, August 22nd, 1941.

APPENDIX C

REPORT OF THE DIRECTOR OF PROFESSIONAL TRAINING

Normal School Attendance

Normal School	Number of Students						
	1938-39	1939-40		1940-41			
	Total	Men	Women	Total	Men	Women	Total
Hamilton.....	97	27	90	117	15	108	123
London.....	123	27	135	162	22	106	128
North Bay.....	74	14	88	102	12	72	84
Ottawa.....	120	35	98	133	7	97	104
University of Ottawa (1st).....	26	13	23	36	10	13	23
University of Ottawa (2nd).....	150	32	117	149	29	144	173
Peterborough.....	64	20	74	94	17	64	81
Stratford.....	107	27	81	108	27	76	103
Toronto (1st).....	229	97	242	339	50	241	291
Toronto Primary School Specialist.....	7	7	21	21
Totals.....	990	292	955	1,247	189	942	1,131

The decrease in attendance of 116 under that of last year may be ascribed entirely to exigencies arising out of the war, 103 fewer males having enrolled in 1940-41 than in 1939-40. Late in August when it became obvious that the number of applicants would fall short of the need for teachers in the Province the Minister made provision to consider for admission candidates who held 8 of the required 9 Upper School papers. One hundred and four entrants were admitted under this provision.

Exchanges

Continuing the practice initiated the previous year Mr. H. G. Lockett of the Hamilton Normal School was on exchange with Mr. C. B. Routley, Inspector for Wentworth, and Mr. R. A. Johnston of the Toronto Normal School with Mr. C. F. Cannon, York (6). During the illness of Dr. G. W. Hofferd of the London Normal School Mr. Gordon Young, Inspector Middlesex West, took charge of the Science department of the London Normal School from January to June. On his recovery during the latter part of this period Dr. Hofferd took over the inspectoral duties of Mr. Young. The practice of exchanging Inspectors and Normal School Masters is working out to the advantage of both groups. The Normal School Masters are enabled to gain intimate first-hand acquaintanceship with the duties and responsibilities for which Normal School graduates are being prepared. The Inspectors on the other hand are made aware of the need for continuing teacher training in the field and of the methods whereby this may be best accomplished.

Permanent Certificates

In order that teachers might more fully participate in war efforts and in conformity with the principle of war-time economy the Department of Education discontinued summer school and winter school special educational courses.

Circular 72, having to do with the granting of permanent certificates, was modified accordingly. During the period of the war teachers proceeding to permanent First Class certificates are being permitted to write on three Normal School papers in place of taking the Summer School Course in Education and to substitute four, six, eight or ten years of successful teaching experience in place of one, two, three or four university or special educational courses respectively.

Publications

Everyday Science for Grade VII, J. M. Dent & Sons, by J. A. Partridge of the Hamilton Normal School, is a copiously illustrated volume which effectively presents the modern method of teaching Science through co-operative group activity, investigation and experimentation.

The Art Class in Action, Longmans Green & Co., by Joicey M. Horne of the Toronto Normal School deals with Art from the viewpoint of the new Course of Study. The uses to which lino cuts, soap sculpture, marionettes and other media may be put in project work as well as in Art classes are set forth clearly and abundantly illustrated.

Dr. Bowers of the Ottawa Normal School, Mr. Rivers of the North Bay Normal School and Professor Daniher of the College of Education produced a number of the very excellent pamphlets used by the Canadian Legion War Services in their educational work among the troops.

Changes in Staffs

In addition to those recorded above the following changes occurred in the staffs of the several Normal Schools.

Miss Doris Rider, part-time instructor of Physical Training in the London Normal School resigned in August and Miss Winnifred R. Prendergast, Secretary of the School was appointed temporarily to take over her duties.

Miss J. M. Moore, part-time instructor of Music in the Hamilton Normal School, was appointed to succeed Mr. Charles E. Wheeler, part-time instructor of Music in the London Normal School who resigned in September.

The services of Mr. F. S. Rivers of the North Bay Normal School staff were loaned to the Committee on Education, Canadian Legion War Services, for the purpose of preparing correspondence courses to be used in providing educational facilities for men in the forces.

Mrs. Pearl Black of the North Bay Collegiate staff was appointed part-time instructor of Physical Training in the North Bay Normal School.

Dr. O. E. Ault, Master on the staff of the Ottawa Normal School, was granted leave of absence for the duration of the war to serve as Senior Technical Advisor to the Director of Technical Instruction, Army Trades School, Department of National Defence. In November J. D. Deyell, Inspector, Hastings North, was appointed to fill the vacancy thus created.

Miss M. R. Elliott of the Ottawa Model School staff, after thirty-four years of faithful efficient service was superannuated in August.

Mr. R. F. Fleming, instructor of Art in the Ottawa Normal-Model School since 1907, was superannuated in August. Miss Bertha Watt of the Ottawa Public School staff was appointed to succeed him as part-time instructor of Art in the Normal School.

Miss E. Mitchell of the Ottawa Model School staff, was transferred in September to the staff of the Toronto Model School.

Miss Patricia Stafford of the Ottawa Model School staff was transferred in September to the staff of the Ontario School for the Deaf, Belleville.

Mr. Q. S. McKinney, instructor of Music in the Ottawa Normal-Model School was appointed to succeed Miss M. R. Rannie, instructor in Music and Physical Training in the Peterborough Normal School who resigned in August after thirty years of effective service.

Miss F. L. Barrigar, instructor of Physical Training in the Ottawa Normal-Model School, was appointed instructor in Music and Physical Training in September.

Mr. Henri Lemieux, Master on the staff of the University of Ottawa Normal School, was appointed High School Inspector in January. Mr. J. E. A. Godbout of the staff of the Kirkland Lake Vocational School was appointed to succeed him.

Miss Dorothea Graham resigned in September from the staff of the Toronto Model School to take a position of Kindergarten Directress on the Ottawa Public School staff.

Mr. Adrian Macdonald of the Toronto Normal School staff was appointed in September to succeed the late Mr. F. Coombs as professor of Education on the staff of the Ontario College of Education.

Mr. Cecil McMullen of the staff of the Toronto Model School was granted leave of absence in March to join the R.C.A.F.

H. E. AMOSS,

Director of Professional Training.

Toronto, March 31st, 1941.

APPENDIX D

REPORT OF THE DIRECTOR OF FRENCH INSTRUCTION ON THE SCHOOLS ATTENDED BY FRENCH- SPEAKING PUPILS, 1940

Inspectoral Changes

Due to a considerable increase in the French-speaking school population of the Sudbury area, a new inspectoral division, known as R.C. Separate Division III and District Division VII, Part III, was established at midsummer 1940. Dr. Louis Charbonneau, M.A., B.Paed., Ph.D., master at the University of Ottawa Normal School, accepted temporary appointment to this inspectorate.

The opening of this new inspectoral division permitted a redistribution of the schools attended by French-speaking pupils into more compact areas of approximately 125 classrooms for each of the twelve French-speaking elementary school inspectors.

Training of Teachers—Improvement in Qualifications

In 1939-40, there were 182 teachers-in-training at the University of Ottawa Normal School, 32 of whom were enrolled in the First Class course, and 150 in the Second Class course. As a result of the term and final examinations, 26 students were awarded First Class teachers' certificates, and 118 obtained Second Class certificates.

The following table shows the number and percentage of Ontario French-speaking elementary school teachers holding First or Second Class certificates in November, 1940, and the progress made in this regard since 1929:—

	1929	1937	1938	1939	1940
Total number of French-speaking teachers in Elementary Schools.....	1,087	1,281	1,316	1,390	1,416
Number of above teachers holding I or II Class certificates.....	273	1,018	1,135	1,271	1,311
Percentage of French-speaking teachers holding I or II Class certificates.....	25.11	79.46	86.24	91.43	92.58

Age-Grade Distribution of Pupils in Elementary Schools

The following tables present a compilation of the French-speaking School Inspectors' Annual Age-Grade Summary Reports for May, 1940:—

NOTE:—Heavy lines denote ideal age spread for each grade.

The following comparative table, for the years 1938, 1939, and 1940, shows the marked progress which has been achieved in the grade-enrolment distribution in all Ontario elementary schools attended by French-speaking pupils:—

Separate and Public Schools

Grade	1938		1939		1940	
	Number	Per cent	Number	Per cent	Number	Per cent
I.....	11,216	23.66	8,955	18.16	8,539	17.12
II.....	6,992	14.75	7,148	14.49	7,057	14.15
III.....	4,974	10.49	6,631	13.45	6,803	13.64
IV.....	5,548	11.71	6,364	12.90	6,541	13.11
V.....	5,828	12.30	5,883	11.93	6,043	12.12
VI.....	4,775	10.07	5,136	10.41	5,036	10.09
VII.....	3,764	7.95	4,018	8.15	4,284	8.58
VIII.....	2,913	6.15	3,436	6.97	3,741	7.50
IX.....	727	1.52	893	1.81	948	1.90
X.....	443	.93	587	1.19	646	1.29
Auxiliary Classes.....	217	.46	268	.54	251	.50
Totals.....	47,397	100.00	49,319	100.00	49,889	100.00

It is worth noting in the above table that, while the total French-speaking school population has increased from 47,397 pupils, in 1938, to 49,889 pupils, in 1940, the percentage of the Grade I enrolment has decreased from 23.66, in 1938, to 17.12, in 1940. The main reason for this more normal enrolment in the Grade I classes is the gradual disappearance of repeaters from these classes. The changes brought about in recent years in the programme of studies and in the methods of teaching for Grade I French-speaking classes have helped materially in reducing the burden of work which was doubtless too heavy for a great number of pupils, but there is still room for improvement in that regard. School boards, in urban centres especially, would be well advised to establish kindergarten classes, which eventually would mean both a saving in school costs and a betterment in educational results.

TABLE No. 2

**ANALYSIS OF AGE-GRADE DISTRIBUTION IN RELATION TO IDEAL AGE-SPREAD
IN ELEMENTARY RURAL AND URBAN SCHOOLS ATTENDED BY
FRENCH-SPEAKING PUPILS, MAY 1940**

(A) Separate and Public Schools

GRADE	Under Ideal Age Spread		Within Ideal Age Spread		Over Ideal Age Spread	
	Number	Per cent	Number	Per cent	Number	Per cent
I.....	163	1.91	7,558	88.51	818	9.58
II.....	94	1.32	5,939	84.16	1,024	14.52
III.....	192	2.82	5,279	77.60	1,332	19.58
IV.....	182	2.78	4,869	74.44	1,490	22.78
V.....	191	3.16	4,424	73.21	1,428	23.63
VI.....	251	4.98	3,692	73.31	1,093	21.71
VII.....	331	7.72	3,302	77.08	651	15.20
VIII.....	376	10.05	2,897	77.44	468	12.51
IX.....	139	14.66	735	77.53	74	7.81
X.....	103	15.94	504	78.02	39	6.04
Totals.....	2,022	4.06	39,199	78.57	8,417	16.87

NOTE:—The 251 pupils enrolled in Auxiliary Classes are not included in the above table.

The percentage of enrolment in the Grade VIII classes has increased from 6.15, in 1938, to 7.50, in 1940. It is confidently expected that in 1943, when the more natural motion imparted a few years ago to the lower classes will have reached Grade VIII classes, the enrolment in the latter should attain approximately 10 per cent of the total school enrolment.

Teachers and inspectors are to be highly commended for the results they have obtained thus far. They should continue, however, to be relentless in their efforts to check the excessive drop in enrolment in the senior grades of the elementary school.

(B) Separate Schools

IX-X.....	7	.26	9	.85	16	.42
Auxiliary.....			19	1.80	19	.50

The following comparative table shows the grade-enrolment distribution of French-speaking pupils in separate and public schools for the years 1938, 1939, and 1940.

Separate and Public Schools

Grades	1938		1939		1940	
	Number	Per cent	Number	Per cent	Number	Per cent
I-IV.....	28,730	60.61	29,098	59.00	28,940	58.02
V-VIII.....	17,280	36.46	18,473	37.46	19,104	38.29
IX-X.....	1,170	2.47	1,480	3.00	1,594	3.19
Auxiliary.....	217	.46	268	.54	251	.50

Secondary School Classes

The following table shows the number of French-speaking students enrolled, in December 1940, in the advanced French courses of Collegiate Institutes, High, Continuation, and Vocational Schools under the supervision of the Department of Education:—

Grade	IX	X	XI	XII	XIII	Total
Number students enrolled.....	440	310	172	132	48	1,102

This total enrolment of 1,102 French-speaking students compares favourably with the totals reported for 1938 (839) and for 1939 (1,027). There are besides, some 2,500 students who are pursuing their studies in the Grade IX and Grade X classes of the elementary schools, [Table No. 1, (A), (i), of this report], and in private secondary schools. Some of the latter are inspected by the Department of Education for the purpose of accepting, or not accepting, the teachers' recommendations in respect to pupils who are candidates for middle school certificates.

Although the above figures show a slight improvement over the situation as reported in the last few years, it is evident that much remains to be done

throughout the province in order to raise the percentage of the French-speaking secondary school enrolment from the present 6 or 7 per cent to at least 18 or 20 per cent of the total French-speaking school enrolment. Of course, as was stated in a previous report, the main cause of this low and rapidly decreasing enrolment from grade to grade in the secondary schools is to be found and eradicated in the elementary school classes. Once the problem is solved in the elementary department of the school—and according to present indications this task will be completed within the next three or four years—there should be automatic improvement in the secondary school enrolment and age-grade distribution of pupils.

The recent appointment of a French-speaking high school inspector will no doubt contribute in a large measure to the desired progress of the secondary school classes attended by French-speaking students.

Provincial Contest

The finals of the third annual provincial contest among the Grade VIII French-speaking pupils were held in Ottawa on March 29th, 1940. Twenty-two contestants—the winning boy and the winning girl from each of the eleven French-speaking inspectorates—took part in this final competition. The four provincial winners, the first two of whom were awarded secondary school scholarships, were as follows:

1st boy: Robert Ethier, 13, R.C.S.S. No. 1, Shackleton, Village of Fauquier;

1st girl: Jeanne d'Arc Lapierre, 13, R.C.S.S. No. 1, Shackleton, Village of Fauquier;

2nd boy: Florent Gauthier, 13, St. Charles School, Timmins;

2nd girl: Yvette Seguin, 14, St. Pierre School, Ottawa.

The fact that the two best candidates came from the same school, a three-roomed village school in Northern Ontario is worthy of note. These pupils as well as their teacher, Miss H  l  ne Bastien, were offered well-deserved praise.

Inspectoral District Enterprises

In 1939, at their annual convention, the French-speaking school inspectors were asked to undertake during 1940 and every year thereafter, in their respective inspectorates, one special enterprise bearing on some particular phase of elementary education. It was suggested also that these enterprises, which should aim at correcting a general weakness throughout the inspectorate or at fostering a new idea in education, be carried on in a scientific manner by taking note of essential data, such as existing conditions at the outset, means employed, difficulties encountered, and results obtained.

Interesting reports were received from the inspectors at the close of the year. Some of the topics which became objects of special research in French-speaking inspectorates, during 1940, are as follows: how to encourage supplementary reading by the pupils; establishment of teachers' study clubs; how to secure better results in mathematics; means of fostering almost perfect attendance on the part of rural pupils; group meetings of school trustees and secretaries; improving the pedagogical organization of the school; the development by pupils and teachers of a Grade I supplementary reader in social studies; larger units of school administration.

The following excerpts are taken from the report submitted on: "*Larger units of school administration*":—

Early in 1940, a number of experienced teachers undertook a special study of sections 15, 16, 17, and 18 of the revised Statutes of Ontario, 1937, setting forth the provisions for the organization of township public school areas. Section 32 of the Separate Schools Act on the formation of union separate school boards was also included in this study, since the majority of the schools in this inspectorate are separate schools and do not come under township school areas. Both the advantages and the disadvantages of the larger unit of administration were carefully considered and noted.

Then teachers in key positions were asked to tactfully ascertain local public opinion on the new scheme of administration through casual discussions with local leaders such as trustees, influential ratepayers, township councillors, etc., and then to report as to how these people reacted to the proposed change.

An examination of the reports relating to township public school areas reveals that public opinion is generally favourable to the larger unit, and that local conditions in at least one of the municipalities are especially well suited to the formation of two such areas, one for public schools attended by French-speaking pupils and one for public schools attended by English-speaking pupils. There are five boards now in operation in each case, so that each of the original sections would have representation on the township area board. Moreover, none of these sections has any school debentures outstanding.

The members of the municipal council are now being consulted on the advisability of their passing a by-law constituting the larger units.

Reports on the formation of larger separate school units under the provisions of section 32 of the Separate Schools Act, are generally in favour of a parochial area, i.e., have all separate schools within the one parish under one board of separate school trustees. There is general opposition, however, in parishes where there are more than three separate school boards now in operation—and this is the case in the majority of parishes—to a union board of only three trustees as specified in section 32 of the Separate Schools Act. A board of at least five trustees, giving representation to each of the original boards on the union board, is generally favoured.

Association of Ontario French-speaking Teachers and Inspectors

The first meetings of a newly-organized provincial association of teachers and inspectors, known as "*L'Association de l'Enseignement français de l'Ontario*", were held in Ottawa on March 29th and 30th, 1940. The members elected as their first president Mr. Joseph Béchard, B.A., B.Paed., master at the University of Ottawa Normal School.

This association, which comprises three sections and is composed of French-speaking elementary and secondary school teachers, inspectors and normal school masters of Ontario, resembles closely, on a smaller scale, the Ontario Educational Association, and, in co-operation with the latter, will no doubt promote the best interests of French education in this province.

A New Grade II Reader in French

A new Grade II Reader in French, entitled "*Deuxième livre de lecture*", was authorized by the Minister of Education and introduced in September, 1940, in schools attended by French-speaking pupils.

This new book, edited jointly by the Department of Education and La Librairie Beauchemin, Ltée., and printed by Le Droit, was very well received by pupils and teachers. Indeed, it filled a need of long standing in Grade II classes. It is hoped that a new Grade III Reader in French, similar to the above, will be available in the near future.

ROBERT GAUTHIER,

Director of French Instruction.

Toronto, June 7th, 1941.

APPENDIX E

REPORT OF THE PRINCIPAL OF THE ONTARIO TRAINING COLLEGE FOR TECHNICAL TEACHERS

Classes and Enrolment, 1939-40

In the school year beginning September, 1939, and ending June, 1940, courses for the following certificates were offered:

Ordinary Vocational Certificate.
Intermediate Manual Training Certificate.

The enrolment in these classes was as follows:

Ordinary Vocational Certificate.....15
Intermediate Manual Training Certificate.....21

The Saturday classes for the Elementary Manual Training, Type B, and the Elementary Home Economics, Type C, Certificates were not offered during this school year.

Summer Session, 1940

The classes offered in the summer session of 1940, and the enrolments, were as follows:

Vocational Specialist.....	16
Vocational Ordinary.....	1
Vocational Guidance.....	26
Vocational Principals.....	24
Vocational Sewing and Dressmaking, Part I.....	20
Vocational Sewing and Dressmaking, Part II.....	21
Manual Training Specialist Extension.....	20
	<hr/>
	128
Less duplicates.....	23
	<hr/>
Net Total.....	105

Classes leading to the Elementary Manual Training Certificate, the Elementary Home Economics Certificate and the Manual Training Specialist Certificate were not offered in the summer session, 1940. These classes had been largely attended in the summer sessions of 1938 and 1939 and their withdrawal in 1940 accounts for the decrease in attendance in the summer session.

The supply of teachers of practical subjects has not been keeping pace with the demand. At present, due to the recognition of the value of technical school training, the shortage of properly trained shop teachers is being felt acutely. The schools have had to employ a number of uncertificated teachers.

Although this shortage of shop teachers has been made more evident by the demands of the war situation, it is not a new thing. It has been felt for some years past and will be more acutely felt as the enrolment in the technical schools continues to increase.

The apparent reason for this shortage is the difficulty in getting properly qualified applicants to take the necessary course of training in methods of teaching. The determining factor appears to be the financial one of subsistence while taking the course.

It is essential that teachers of practical subjects in technical schools be highly skilled craftsmen in their respective fields. That this may be, applicants for admission to the Training College for Technical Teachers are required to have served the usual period of apprenticeship in the trade concerned, and to have had some years' journeyman experience with approved firms, sufficient to show that they are skilled workers. It follows that they are mature persons, usually from twenty-five to thirty years of age, established in their occupation, and, as a rule, married and with family responsibilities. To make a change to teaching, involving several months training with no income, is a serious step, sometimes, for financial reasons, impossible to take.

F. P. GAVIN,
Principal.

Hamilton, May 1, 1941.

Ridgetown Public School Garden

APPENDIX F

REPORT OF THE INSPECTOR OF AGRICULTURAL CLASSES

The Need for Instruction in Agriculture

Two objectives must be recognized in relation to agricultural instruction in the schools; the development of a background of knowledge and the training in practical operations related to activities of the farm, the garden and the care of home grounds. The first is applicable to all pupils in all schools, the second is limited according to the accommodation and equipment available and the location of the individual school. The need of instruction in urban schools is more necessary than ever if pupils are to have a knowledge of the sources of the foods which are marketed in a more or less processed form. Many older men and women living in cities were reared in rural areas and methods of primary production of food materials are familiar to them. This knowledge may be entirely lacking in their children who are reared in an entirely different environment and whose contact, if any, with primary production is often limited to brief visits to the farms of friends where a superficial knowledge may be obtained. It is, therefore, very desirable that systematic instruction in Agriculture be offered in urban schools. Whenever possible a school garden should be maintained so that pupils may learn methods of planting and caring for vegetables and flowers. Pupils should also have a share in the care of the lawn and of beds of shrubs and herbaceous perennials. A good programme of school gardening is carried on in Ottawa, Hamilton, Kitchener and Windsor. Home gardens as well are maintained in the above and other cities throughout the Province, but Agriculture is taken in only about 60% of urban elementary schools. The need of instruction in Agriculture is not yet recognized on an equal basis with other subjects.

In rural areas instruction in Agriculture is also important. With specialization of farming in many districts the home and community background of many pupils is entirely changed as compared with a generation ago. The child's knowledge of farm activities may be limited to those related to the type of farming conducted at home and he may have little opportunity to learn of other branches of farming. School gardens should be maintained in rural elementary schools so that all pupils may have instruction in methods of growing vegetables and flowers. These activities are maintained in many farm homes, but not in all. Practice in care of the school grounds will often create a desire to improve home surroundings. All pupils in rural areas, according to past statistics, do not later engage in farming, but for those who do the prescribed courses offer a wide range of information beyond that which can be gained on any one farm. The pupil may also realize that Agriculture is a study as well as a practice and that much can be learned from publications and other agencies of the Dominion and Provincial Departments of Agriculture. Present regulations provide that instruction in Agriculture may be offered in all rural elementary schools. When a teacher holds a certificate in Agriculture the Board is entitled to a refund of expenditure

up to \$30.00, and half this amount when the teacher does not hold a certificate. All teachers take Agriculture as a part of their Normal School course and may, therefore, teach this subject. In urban elementary schools the teacher must hold a certificate in Agriculture if grants are to be paid to the Board, but any teacher may teach the subject if time is provided on the time-table and expenses are paid by the Board.

In general the arguments presented above apply to pupils of secondary schools, but, owing to the more advanced age of the pupils and more adequate accommodation and equipment, it is possible to provide a great deal more practical work at school and also at home under a home project programme. Teachers in secondary schools must hold the Specialist or the Intermediate Certificate in Agriculture.

Elementary Schools

Reports on instruction in Agriculture for the school year ending June 30th, 1940, were received from 3,879 or 54.2% of all elementary schools. This number is considerably less than for the previous year and is due to two factors. First, reports were formerly submitted from all schools in which instruction was given whether or not the Board was entitled to a grant. Reports received for the above period represent the number of schools where a grant was payable to the Board. Second, the new courses for elementary schools introduced in 1937 provide a course in science which includes some agricultural topics and an optional course in Agriculture for Grades VII and VIII. In many schools agricultural topics are being taught as a part of the science course and no special report is submitted. It seems certain that, on the whole, attention and interest is still at the former high level and that instruction in agricultural topics is being well maintained in the elementary schools of the Province during the period of adjustment to new Regulations and courses.

One phase of instruction has been given special emphasis during the year, i.e. improvement of school grounds. In September, 1940, a booklet entitled "Suggestions for Improvement of Rural School Grounds" was issued by authority of the Minister of Education and sent to all inspectors for distribution to teachers and secretaries. This booklet was the result of a number of meetings of an inter-departmental committee including officials from the Departments of Agriculture, Education and Lands and Forests. In many schools more attention has been given to care of the grounds, improvement of fences, planting of trees and shrubs and where necessary levelling and grading the playgrounds. All inspectors have co-operated in the programme and good results can be observed in every part of Ontario. Many of the activities can be performed by the pupils under the direction of the teacher and are a part of the practical work in agricultural instruction. The cost of seeds, shrubs, lawn mower and other tools when used by the pupils may be charged to the agricultural grant as provided in the Regulations. Valued assistance in advice and supplying of materials has been rendered by officers and members of the Ontario Horticultural Association and by officials of the Forestry Branch, Department of Lands and Forests, in the campaign for school ground improvement.

Early in 1940 changes were made in the organization of School Fairs. Distribution of seeds was discontinued and the management of fairs placed in charge of local committees acting with the inspector and the agricultural representative. In the fall of 1940, 70 fairs representing 376 schools were held.

Secondary Schools

The number of secondary schools in which Agriculture was taught in the fall of 1940 was 170, the same as last year. Interest in the subject is well maintained and changes in Regulations which provide for payment of grants to Boards only have not affected any school in which the work was well established. Recognition by trustees and others of the value of instruction in Agriculture is shown by the fact that when changes of teachers occur, Boards advertise for a successor holding a certificate in Agriculture. The number of schools starting the work in September, 1940, was less than in recent years due to the fact that no summer courses were held in 1940. The subject has usually been introduced by a teacher of science who qualifies for the Intermediate certificate by attendance at summer school. Each year a number of new teachers are available, graduates of the Ontario Agricultural College who complete the course at the Ontario College of Education, but these teachers generally find employment in schools where Agriculture is already taught. During the fall of 1940 a scarcity of qualified teachers occurred due to enlistment and to the fact that no summer course was held. This condition is likely to continue for the duration of the war.

The character of instruction in both science and agricultural topics is of a good standard. Experimental work is regularly taken in the laboratory when accommodation is adequate. Greater attention is being given to practical work related to agricultural topics. Incubators are operated each spring in nearly every school and some chicks are kept in brooders at the school for a week or more. Small poultry houses have been provided at fifteen schools. These are used during the winter to house laying birds and in the spring for rearing chicks. Pupils in these schools gain a practical knowledge of methods of feeding and care by actual practice. Colonies of bees are kept in a number of schools and are used for observation and instruction. School gardens are maintained in 156 schools. These vary in size from the minimum area of 2,400 square feet to half an acre or more. The condition of the gardens when observed during the summer is showing improvement each year. In many schools pupils are receiving instruction and practice in improvement and care of the school grounds. During the fall of 1940 pupils from many schools in which Agriculture is taught worked on farms during September and part of October and assisted materially in harvesting fruits and other crops. Due to limited time and equipment at school it is impossible to offer instruction in all farm practices. Yet the ability of pupils to perform operations related to the activities of the farm, garden and home should be considered in an agricultural course. A closer relationship between instruction at school and activities at home should be provided. To this end a circular letter was sent, in the fall of 1940, to teachers of Agriculture, suggesting that a survey of the ability of pupils to perform various operations be made in each class and that marks be assigned on the year's work for proficiency of pupils. Excellent surveys were made by a number of schools and the plan was later used as a basis in organizing groups of pupils in various schools for enrolment in the Farm Service Force for 1941.

Through the co-operation of the editor of *The School* articles written by teachers on various agricultural topics have again been published during the year. These articles deal with particular phases of instruction which have been successfully conducted by the authors in their own schools.

The subsequent paragraphs of this report give statistics and comments relative to the progress of agricultural instruction in elementary schools, secondary schools, summer schools and the normal schools.

Public and Separate Schools

The number of schools which have met the requirements of the regulations and qualified for grants for Form III, Form IV and Form V, since 1903, is given in the abbreviated table following:

Year	Number of Schools	With School Gardens	With Home Gardens
1903.....	4		
1913.....	159		
1914.....	264	208	56
1920.....	1,648	702	946
1928.....	3,395	1,059	2,336
1937.....	5,065	1,580	3,485
1939.....	4,749	1,941	2,808
1940.....	3,879	1,446	2,433

The figures for 1940 are based on the number of schools which qualified for grants. Figures for previous years include all schools from which reports were received whether or not the Board qualified for a grant.

The following table shows the certificates held by teachers engaged in the work for the years given:

Year	Elementary	Elementary Part I	Intermediate	Intermediate Part I	Totals
1934.....	1,552	86	144	10	1,792
1935.....	1,957	106	163	16	2,242
1936.....	2,092	208	188	22	2,510
1937.....	2,351	502	218	42	3,113
1938.....	2,864	444	259	52	3,619
1939.....	3,132	238	312	33	3,715
1940.....	2,508	112	307	16	2,943

In addition to the courses for Form III and Form IV, Agriculture of the Lower School course was taken in fifth classes of 427 schools under the Regulations for Public and Separate Schools. The Lower School courses taught by a teacher holding an Intermediate Certificate are taken under the High School Regulations in the following schools: Cameron Public School; Elizabeth Ziegler Public School, Waterloo; Mono Mills Public School; St. Andrew's West Separate School; St. Raphael's West Separate School; Victoria Public School, Kitchener; Tecumseh Public School; Toronto Public Schools: Brown, General Mercer, McMurrich, Perth Avenue.

Secondary Schools

Instruction in Agriculture in secondary schools is provided under three schemes as stated below and may be taken in those schools which meet the requirements of the Department of Education.

1. Optional classes in Lower and Middle School as a part of the course for Normal Entrance or Matriculation.
2. Department of Agriculture under The High Schools Act.
3. Department of Agriculture under The Vocational Education Act.

Under scheme (1) above, Agriculture was taught during the year in the schools listed below. Under (a) are the schools in which Lower School courses only are taken, and under (b) both Lower and Middle School courses.

Collegiate Institutes

(a) Clinton, Cornwall, Goderich, Ingersoll, Kitchener, Oshawa, Perth, Seaforth, York Memorial, Vaughan Road. Total 10.

(b) Barrie, Belleville, Brockville, Cobourg, East York, Fort William, Lindsay, Napanee, Orillia, Picton, Port Arthur, Renfrew, Runnymede, Scarborough, Smith's Falls, Stamford, Strathroy. Total 17.

High Schools

(a) Blenheim, Bracebridge, Cobalt, Durham, Englehart, Essex, Havelock, Markham, Marmora, Mattawa, Maxville, Meaford, Merriton, Mount Forest, *Newcastle, Niagara, Orangeville, Port Credit, Ridgeway, Tilbury. Total 20.

(b) Alexandria, Alliston, Amherstburg, Arthur, Athens, Beamsville, Bowmanville, Brighton, Burford, Burlington, Caledonia, Cayuga, Chesterville, Dundas, Dunnville, Elmira, Fergus, Forest, Fort Frances, Grimsby, Hagersville, Haileybury, Harrow, Iroquois, Kemptville, Kincardine, Kingsville, Lakefield, Leamington, Listowel, Lucan, Madoc, Markdale, Midland, Milton, Mitchell, Morewood, Nepean, Newburgh, New Liskeard, Norwich, Norwood, Oakville, Omemee, Petrolia, Port Elgin, Port Perry, Ridgetown, Saltfleet, Shelburne, Simcoe, Smithville, Stirling, Streetsville, Sydenham, Trenton, Tweed, Uxbridge, Waterdown, Waterford, Watford, Whitby, Williamstown, Winchester. Total 64.

Continuation Schools

(a) Ailsa Craig, Arkona, Bothwell, Burk's Falls, Chatsworth, Coldwater, Eganville, Elgin, Forester's Falls, Forest Hill Village, Grand Valley, Hensall, Minesing, Richard's Landing, Russell. Total 15.

(b) Agincourt, Ayr, Beaverton, Brooklin, Brownsville, Comber, Delta, Drayton, Drumbo, Embro, Florence, Fordwich, Ilderton, Inglewood, Little Britain, Lobo, Lynden, Lyndhurst, Melbourne, Merlin, Merrickville, Milverton, Mindemoya, Mount Albert, Mount Brydges, Mount Elgin, Mount Pleasant, New Dundee, New Hamburg, Orono, Pelham, *Port McNicoll, Princeton, St. George, Sparta, Stevensville, Sundridge, Tamworth, Teeswater, Thamesford, Thamesville, Tiverton, Wheatley, Woodville. Total 44.

A summary of the above shows that Agriculture is now taken in twenty-seven Collegiate Institutes, eighty-four High Schools and fifty-nine Continuation Schools, a total of 170. During the year the work was introduced in one High School and one Continuation School and was discontinued in two High Schools. Both Lower and Middle School courses are taken in one hundred and twenty-five schools.

The following abbreviated table shows the development in this phase of instruction since its beginning in 1913 and the number of schools now taking the work.

*Introduced Agriculture in September 1940.

Year	Collegiate Institutes	High Schools	Continuation Schools	Total
1913.....		1	1	2
1918.....	8	13	4	25
1928.....	14	44	23	81
1933.....	24	54	33	111
1937.....	27	83	48	158
1938.....	27	85	55	167
1939.....	27	85	58	170
1940.....	27	84	59	170

Two hundred and seventeen teachers are engaged in giving instruction in Agriculture. Of this number, one hundred and thirty-three hold the Specialist certificate, ninety-three being graduates of the Ontario Agricultural College.

The following schools are taking work under the scheme indicated in (2) above: Drayton, Elmira, Listowel, Port Perry, Wheatley and Whitby. Additional time is given to Agriculture and practical phases of the subject are stressed. At Elmira, Port Perry and Whitby provision is made for Shop Work for boys and Home Economics for girls.

Under (3) above, the following schools are qualifying for grants under the Vocational Education Act: Beamsville, Kemptville, Renfrew, Ridgetown, Stamford and Simcoe. In all, provision is made for instruction in Shop Work, and in all except Stamford, for Home Economics. The regular courses in these subjects, with special emphasis on agricultural applications, are being followed. In all centres practical applications of agricultural topics are stressed, a regular programme of home project activities is conducted and the teachers visit the homes of pupils to inspect the projects undertaken.

Summer Courses

Summer courses in Agriculture were not held in 1940. Consequently teachers were unable to qualify for the Elementary or Intermediate certificates and, as previously noted, this has affected the extension of instruction in Agriculture particularly in secondary schools.

Normal Schools

There have been no material changes in the Normal School course in Agriculture. Except in the University of Ottawa Normal School, instruction in Agriculture is a part of the regular course and the subject is taken by all students. Students who have taken four years of Agriculture in an approved school during their secondary school course are granted an Interim Elementary Certificate on successfully completing the Normal School course. Others must attend summer school to secure a certificate in Agriculture.

Facilities for instruction in practical phases of gardening and other topics are provided, the instructors are all qualified in Agriculture and a good course is given as far as the time allotment on the Normal School programme will allow.

NORMAN DAVIES,
Inspector of Agricultural Classes.

Toronto, July 15th, 1941.

APPENDIX G

REPORT OF THE INSPECTOR OF AUXILIARY CLASSES

Statistical Information for the School Year, 1939-40

Opportunity Classes.—For backward and psychopathic children and those who have not successfully pursued the ordinary grade work, but who can be trained and whose mental age is not less than the legal school age.

Urban Organization

During the year under review, one Opportunity Class was closed in each of the following municipalities: Etobicoke, Toronto, North Bay, Stratford, Swansea, Welland, York Township.

In addition, to the classes mentioned in the statistics, the following auxiliary classes were opened during the Fall Term 1940: Hamilton, 1; Kingston, 1; Niagara Falls, 1; Oshawa, 1; Ottawa, 1; Timmins (Separate), 2.

Surveys were conducted in Kingston, Smith's Falls and Niagara Falls.

Courtesy inspections were made of the Readjustment Classes established by the Hamilton Board of Education. These classes established as 'catch-up' classes, under the instruction of specially selected teachers, have been giving satisfactory results. Such classes are acceptable as either Opportunity or Handicraft Classes where the requirements as to the certification of the teacher, classroom accommodation and provision of special equipment are satisfactory.

Readjustment of pupils to enable them to carry on in the regular grade classes is one of the goals of the Opportunity and Handicraft Classes. Teachers of Opportunity Classes have reported that as many as six pupils, out of an enrolment of twenty, have been enabled to return to the regular grade classes. In some cases, the readjustment to grade class conditions has been gradual. The pupil attends the regular grade for one or more subjects per day and is transferred only after having demonstrated his ability to keep up with the grade. Segregation is necessary because individual methods are used for pupils who are severely handicapped or retarded. When the number of seriously retarded pupils is small, it is advisable to include in Opportunity Classes those pupils who require readjustment in one or more subjects. Their inclusion helps to overcome a stigma which may attach to a class composed of pupils who have not previously

had academic success. The admission of pupils who will benefit by an adjustment programme enables a class to perform a greater amount of service. It demonstrates that pupils can expect promotion and creates greater circulation of pupils. In some cities the following devices are used to increase the usefulness of the classes:

(a) Grades I and II pupils who are casualties in learning to read, are sent in groups to the Opportunity Class between 11:30 and 12:00 a.m.

(b) Pupils from Grades III-VIII who are casualties in Arithmetic, Spelling or Speech, are given an extra half-hour of this subject under the supervision of the Opportunity Class teacher.

The general plan on which the Auxiliary Classes in Ontario have been operating successfully may be restated as follows:

(1) to assess the pupil's abilities as accurately as possible to determine his present levels of achievement, his handicaps and his rate of learning;

(2) to commence instruction below his present learning levels and promote on a subject basis;

(3) to provide training in those activities which give successful results before attempting those subjects in which the pupil has failed. (This is the main reason for introducing handwork, enterprises and sand-table projects);

(4) to use new, suitable and accurately-graded materials which have not the disadvantage of being associated with the pupil's failure;

(5) to apply special remedial techniques as required;

(6) to assess the pupil's progress accurately and sympathetically.

Rural Organizations

Complete and partial surveys of the following rural inspectorates were carried out by Miss DeLaporte and myself in conjunction with the inspectors concerned.

Inspectorate	Inspector	Number of pupils interviewed
*Grey South.....	Geo. E. Pentland, M.A.....	27
Lennox and Hastings South (in part).....	K. O. Birkin, M.A., B.Paed.....	59
Simcoe South, York (in part).....	C. A. Lapp, B.A., B.Paed.....	109
Waterloo (No. 2).....	Charles Howitt, B.A., B.Paed.....	79
Welland East.....	Z. S. Phimister, B.A., B.Paed.....	118
District Division XIV.....	E. R. Underhill, B.A.....	105
*District Division XV.....	J. L. Moore, B.A.....	33
	Total.....	530

*Partial survey.

Throughout the academic year, a considerable part of the regular work of the Auxiliary Classes Branch is the writing of advisements for pupils reported by inspectors and teachers who send in the results of tests, and estimates of abilities in the various subjects. Where the oral reading test in the Binet Examination has been given, it is easier to make recommendations in this subject.

The Inspectors of Auxiliary Classes wish to express their appreciation of the assistance of Inspectors A. A. Martin, W. J. Stewart, Gordon Young and N. R. Wightman who provide written advisements for pupils in their respective inspectorates and thereby conduct a continuous survey. The greatest problem in the organization of Opportunity and Sight-Saving Units in the rural and smaller schools is the follow-up work. This devolves upon the local inspector who must add to or vary the original advisement as the pupil progresses. With about 2,000 units in operation in most of the inspectorates, it is essential that their supervision should be the care of the public or separate school inspector.

In June 1940, information was collected through the inspectors which showed that over 50% of the pupils in Opportunity Units were making substantial progress; that over 25% of the pupils moved to another school, and that in the remainder of the cases there was little or no progress.

Adult Classes in Sanatoria

Grants were made available in 1939 to support classes already existing in various Sanatoria. The need for this action came about through the development and use of study as a therapeutic measure in the hospitals. At the same time, the Board of Education of London and of Toronto were beginning to question the propriety of providing educational facilities for pupils who were non-residents. Originally teachers were provided for pupils in Grades I-X inclusive because they were residents of these cities but domiciled in the nearby Preventorium. The work of preventing tuberculosis in pupils has been so efficiently done that fewer pupils from these cities are required to take hospital treatment. The plans for medical treatment at present seldom keep a child in a hospital for a long period for observation or medical and nursing care.

These two factors have reduced the number of children attending hospital classes in sanatoria and increased the number of adults and adolescents who wish to continue their education.

The London Board of Education did not replace Miss Fisher, teacher at the Preventorium who retired in June 1940. The Toronto Board of Education withdrew its teaching staff from the Queen Mary Hospital at Weston in June 1940.

To meet the educational needs of patients in the Sanatoria, classes have been established in:

1. Gravenhurst Sanatorium
2. Byron Sanatorium, London
3. Queen Mary Hospital, Weston
4. Mountain Sanatorium, Hamilton
5. Brant Sanatorium, Brantford
6. Freeport Sanatorium, Kitchener.

The method of instruction is chiefly individual and is carried on at the patient's bed. The patients are studying courses from the primary school level to fourth year university work. Among them are:

1. New Canadians learning to read and write English.
2. Mature men and women preparing for Entrance to High School.
3. Patients taking commercial and regular secondary school courses.
4. Patients taking a Radio Communications Course, prepared by an expert also a patient.
5. Patients taking clockmaking from a certificated teacher who had served his apprenticeship in this craft.
6. Patients taking University subjects.

Habilitation Units

This scheme was authorized in 1939, and provides for an expenditure of not more than \$2,000 on the training of ten pupils who are cripples and who have completed their education by correspondence or home instruction, or who, for any reason, are unable to secure training which would help them to earn a livelihood. The expenses which may be provided are: tuition, board and transportation. In 1939, two pupils were given habilitation training. One of the two now has a protected job. During the autumn of 1940, a third case commenced a course in dressmaking under the instruction of a dressmaker. Previous to this she had completed the Grade X course. This course in dressmaking was offered as a means of training her in some art with which she could serve the area in which she lives. Since the course began, she has been found able to do hand sewing and design, but does not handle a foot-powered sewing-machine.

Other similar cases are on file. Action in each case must wait until the child has completed the elementary school course and arrangements are made with some local craftsman to act as trainer. Recommendations will be made to the Minister of Education when the plans of the local school inspector are formulated and the arrangements give hope of successful training in an art or craft which offers some chance of employment within the area in which the adolescent resides.

Home Instruction by Telephone

The London Board of Education has provided a set of telephone instruments connected in such a manner that a home-bound pupil may receive instruction from a classroom in Ryerson School. The pupil hears the teacher from a two-way telephone at the front of the room and the pupils from a one-way instrument at the back of the room. He may join in the class discussions by pressing a lever on his own two-way instrument at his bedside.

The Bell Telephone Company provides a line at the regular rates. The teacher visits this special pupil twice a week and his written work is marked regularly.

Sight Saving Readers

Due to the war and the necessity for using foreign exchange, the importation of sight-saving books published by the Clear Type Publishing Committee has decreased, with consequent detriment to those pupils who require books printed in 24-point type.

Books imported from U. S. Publishers differ from the authorized texts used in Ontario. This causes some extra work for the teacher who feels that the practice of sight-saving and the provision of supplementary and work exercises in large writing present enough problems without having to study reading and literature from a separate text.

In October 1940 a memorandum was approved under which the Auxiliary Classes Branch was to prepare sight-saving editions of the authorized readers and arithmetics.

Permission has been secured from the following publishers to make, without cost, editions of 200 copies of all or parts of the books listed:

Publisher	Text
1. Thomas Nelson and Sons.....	<i>Golden Windows</i>
2. Copp Clark Company.....	<i>Gateways to Bookland</i>
3. W. J. Gage & Company.....	<i>Ontario Arithmetics</i> (Grades 3-8 inclusive)
4. W. J. Gage & Co., and Thomas Nelson and Sons..	<i>Life and Literature, Book I</i>
5. Macmillan Company and Ryerson Press.....	<i>Treasury Readers</i> (Grades 5 and 6)

Golden Windows Part I and *Gateways to Bookland Part I* have been copied in magnatype and are ready for distribution. *Social Studies for Grade V* has been ready since July 1940.

The following books are still available free of charge to duly established Sight-Saving Units:

Life and Literature Book II

Ontario Speller Part I and Part II.

Bett's Telebinocular

This machine was purchased during 1940 for the purpose of studying pupils' difficulties in reading. It was first used in the summer school in teaching diagnosis and remedial work in reading.

Because of the number of surveys listed for 1940, it was not possible to find the time to use it in rural schools. At present it is being used in our regular classes as an aid to reading diagnosis during inspections.

The Canadian Intelligence Examination

After many years of waiting for an intelligence test based on Canadian data and experience, the teaching profession received a Canadian revision of the *Binet-Simon Test* in September 1940. It is published by the Ryerson Press under the title of "*The Canadian Intelligence Examination*" by Dr. H. E. Amoss and Dr. C. G. Stogdill.

The Auxiliary Classes Branch and the Chief Inspector's Office have been charged with the duty of testing the reliability of the Canadian Intelligence Examination.

Survey of Indian Schools

At the request of Mr. Hoey, Superintendent of Indian Affairs, a survey of seven residential Indian Schools in Ontario is under way.

Training of Teachers

In 1940, three courses were given at the summer school session held at Jarvis Street School for Boys, from July 8th to August 9th. Course I was given for teachers of Opportunity and Handicraft Classes; Course II was given as a Refresher Course for teachers in possession of certificates who desired to extend their experience in testing; Course III was for teachers who were not desirous of teaching in the regular Auxiliary Classes but who wished to study intelligence testing, special methods for individual cases and mental hygiene of instruction. Six teachers of the 214 registered were from the Provinces of Nova Scotia, Quebec, Manitoba and Saskatchewan.

The meeting of the International Council for Exceptional Children at Pittsburgh in February provided an opportunity to visit special schools and to receive

information from authorities gathered from all parts of North America. Teachers from Hamilton, Ottawa and Toronto were in attendance.

The usual lectures on Auxiliary Education were given to the students at each of the Provincial Normal Schools.

The Auxiliary Class magazine, *The Special Class Teacher*, serves the members of this group and an increasing number of grade teachers with timely articles on the problems exhibited by exceptional pupils.

Miss L. Helen DeLaporte, B.A., B.Paed., Assistant Inspector of Auxiliary Classes, attended Teachers' College, Columbia University, for a semester to study Remedial Reading, the Psychology of the Handicapped and to survey the problems presented by Orthopaedic Cases. Miss DeLaporte in attending these courses has studied techniques and methods which added to her own rich experience, have already proven useful and practical in providing for the education of exceptional children in this Province.

C. E. STOTHERS,
Inspector of Auxiliary Classes.

Toronto, July 23rd, 1941.

APPENDIX H

REPORT OF THE DIRECTOR OF SCHOOL ATTENDANCE

Schools can do their best work only when pupils attend regularly. I am pleased to be able to report that the percentage of attendance was high in both elementary and secondary schools during the school year 1939-40. Figures giving the enrolment and record of attendance for the various types of schools will be found in the statistical tables that follow.

Table No. 1—Enrolment

	1937-38	1938-39	1939-40	Increase or Decrease for year
Public Schools.....	454,509	453,182	441,143	12,039 decr.
Separate Schools.....	102,505	104,466	102,180	2,286 decr.
High Schools and Collegiate Institutes.....	68,700	72,247	73,102	855 incr.
Continuation Schools.....	9,251	9,866	10,048	182 incr.
Vocational and Special Industrial Schools—				
Day Classes.....	37,748	35,779	37,900	2,121 incr.
Night Classes.....	32,083	36,481	34,983	1,498 decr.
	704,796	712,021	699,356	12,665 decr.

Pupils enrolled in the 6,485 Public and 859 Separate Schools were taught by 18,046 teachers. These figures represent an increase of 30 Public Schools, 13 Separate Schools, and 90 teachers. It will be seen that classrooms newly opened more than offset classrooms or schools closed by reason of low enrolment. The decrease in the number of pupils attending elementary schools is explained by the lower birth-rate during the years of economic depression. The increase in the number of pupils attending day classes in the Vocational Schools is significant when compared with the smaller increases noted for High Schools, Continuation Schools, and Collegiate Institutes. The Vocational Schools are evidently becoming increasingly attractive to students about to enter their first year of secondary school training.

Table No. 2—Percentage Attendance

Class of School	1936-37	1937-38	1938-39	1939-40	Increase over 1938-39
City Schools.....	92.49	92.96	91.5	92.8	1.3
Town Schools.....	92.67	93.08	92.2	93.3	1.1
Village Schools.....	91.83	91.95	91.0	92.7	1.7
County Rural Schools.....	87.65	88.77	89.6	90.3	.7
District Rural Schools.....	87.22	86.85	87.4	89.9	2.5
All Urban Schools.....	92.49	92.92	91.6	93.0	1.4
All Rural Schools.....	89.34	89.13	88.0	90.2	2.2
All Elementary Schools.....	90.91	91.51	90.3	91.9	1.6

From the above table it will be seen that the attendance record for 1939-40 surpassed the record of the previous year in all types of elementary schools.

School Leaders in Attendance

1937-38	Per cent.	1938-39	Per cent.	1939-40	Per cent.
City of Galt.....	95.69	City of Galt.....	94.7	City of Kitchener } ..	95.5
Town of Elmira.....	97.41	Town of Palmerston...	96.1	City of North Bay } ..	
Village of Mildmay...	96.28	Village of Casselman...	97.6	Town of Hespeler...	96.6
County of Waterloo...	93.46	County of Oxford....	94.0	Village of Neustadt..	97.4
District of Kenora....	89.36	District of Kenora....	89.4	County of Waterloo..	94.0
				District of Kenora...	90.4

Table No. 3—Public School Attendance

	1938-39		Days Lost per Pupil	1939-40		Days Lost per pupil
	Average Attendance	Percentage Attendance		Average Attendance	Percentage Attendance	
Rural.....	158,092	87.8	20.09	160,911	90.0	18.9
Urban.....	238,982	91.4	13.82	236,285	92.7	14.1

Table No. 4—Separate School Attendance

	1938-39		Days Lost per Pupil	1939-40		Days Lost per Pupil
	Average Attendance	Percentage Attendance		Average Attendance	Percentage Attendance	
Rural.....	20,367	90.0	17.6	21,753	91.6	16.0
Urban.....	73,936	92.5	14.0	72,906	93.7	12.4

Table No. 5—Totals

(Tables 3 and 4 combined)

	1938-39		Days Lost per Pupil	1939-40		Days Lost per Pupil
	Average Attendance	Percentage Attendance		Average Attendance	Percentage Attendance	
Rural.....	178,459	88.0	19.89	182,664	90.2	18.5
Urban.....	312,918	91.6	13.16	309,191	93.0	13.7

Table No. 6—All Elementary Schools

	1938-39		Days Lost per Pupil	1939-40		Days Lost per Pupil
	Average Attendance	Percentage Attendance		Average Attendance	Percentage Attendance	
Public.....	397,074	89.9	18.7	397,196	91.6	16.1
Separate.....	94,303	92.0	14.8	94,659	93.1	13.2

The percentage attendance for all elementary schools was 91.9 and the average loss per pupil was 15.5 days.

Table No. 7—Absence in Elementary Schools

Days lost through	1939-40	Percentage Loss			
		1936-37	1937-38	1938-39	1939-40
Illness.....	5,533,860	65.41	62.39	66.99	65.85
Home Help.....	828,916	9.11	9.91	7.79	9.86
Parental Neglect.....	586,879	5.92	6.95	6.06	6.98
Physical Obstacles.....	314,835	2.62	3.81	4.56	3.75
Truancy.....	26,723	.28	.32	.24	.32
Privation.....	88,834	1.04	1.04	1.04	1.06
Irregular Closing.....	508,997	4.56	5.85	6.67	6.06
Other Reasons.....	514,444	11.05	9.73	6.65	6.12
Total days lost.....		9,083,567	8,734,593	9,983,079	8,403,488
The above losses are classified—					
Lawful.....		6,845,284	6,329,014	7,680,348	6,327,689
Unlawful.....		2,238,283	2,405,579	2,302,731	2,075,799
Percentage attendance.....		90.91	91.5	90.3	91.9

An analysis of the above table shows that the loss for Home Help increased 2.07 per cent. for the year, and that much of this absence was not sanctioned by the Attendance Officer. The harvesting of seasonal crops—tomato, tobacco, fruit, potato, and corn—is largely responsible for such absence in rural communities where children prove very useful in field and orchard. Weather conditions were generally more favourable to good attendance during the year, and losses attributable to Physical Obstacles—such as impassable roads—decreased noticeably.

Table No. 8—Summary of Attendance Officers' Reports

	1938	1939
School Children's Employment Certificates Issued.....	350	710
Home Permits Issued.....	1,730	1,389
Employment Certificates Issued.....	1,907	2,146
Cases brought before Magistrates.....	527	528

The statistics in the foregoing table are for the calendar years. School Children's Employment Certificates may be issued to pupils younger than fourteen years of age, under certain conditions, and are good for not more than six consecutive weeks in a term. Home Permits, sanctioning work in the home, may be issued to adolescents, aged from fourteen to sixteen years. Employment certificates are necessary when adolescent pupils are authorized to work away from home. Permits and Certificates are issued by local attendance Officers, who now number approximately 2,300 throughout the Province.

Table No. 9—Secondary Schools

Schools	No. of schools	No. of teachers	Enrolment		Percentage Attendance	
			1938-39	1939-40	1938- 39	1939- 40
High Schools and Collegiates	228	2,762	72,247	73,102	94.2	94.6
Continuation Schools	202	569	9,866	10,048	91.9	91.4
Vocational and Special In- dustrial Schools	64	1,761			*93.3	*94.0
Day			35,709	37,900		
Night			36,481	34,983		
			72,260	72,883		
	494	5,092	154,273	156,033		

*Day Schools only.

In closing this report I should like to pay tribute to the parents and teachers whose zeal in encouraging regular attendance at school is so highly important.

R. D. KEEFE,
Director of School Attendance.

Toronto, May 30th, 1941.

APPENDIX I

REPORT OF THE SUPERINTENDENT OF THE ONTARIO SCHOOL FOR THE DEAF

I have the honour to submit the Annual Report of the Ontario School for the Deaf for the year ending April 1st to March 31st, 1941.

Attendance

Enrolment by months:—

	Boys	Girls	Total
April, 1940.....	142	151	293
May.....	141	151	292
June.....	141	151	292
September.....	140	153	293
October.....	147	154	301
November.....	147	154	301
December.....	149	153	302
January, 1941.....	151	159	310
February.....	151	158	309
March.....	152	158	310

Average attendance for the year—300.

Enrolment by counties and districts:—

Totals.....	49	24	34	27	30	44	23	21	25	17	11	1	4	1	311

Nine of these completed the courses given at the school, including full-time vocational work for the last year in school. Six others obtained High School Entrance certificates. Seven were hard-of-hearing pupils, some of whom returned to public schools. Six of the remaining ten stayed at home to work, one is attending another School for the Deaf, and one is ill. Two left because they were unable to benefit by the instruction given them.

Fifty new pupils were admitted and their ages on admission were:—

4 years.	2 pupils	11 years.	1 pupil
5 years.	12 "	12 years.	1 "
6 years.	9 "	13 years.	2 pupils
7 years.	7 "	14 years.	None
8 years.	5 "	15 years.	3 pupils
9 years.	4 "	16 years.	2 "
10 years.	2 "		

Only two new pupils over ten years of age had not attended school previously. These two, fifteen and sixteen years of age, respectively, had been kept at home by their parents.

National Society of the Deaf and the Hard of Hearing

During the past four years several meetings have been held by representatives of the deaf, the hard of hearing, and their friends, for the purpose of forming an organization to help those afflicted with total or partial deafness. As a result of their efforts a Charter was granted by the Government of the Dominion of Canada to a corporation to be known as the National Society of the Deaf and the Hard of Hearing, with head office in Toronto. The charter was granted in March and the head office opened a few weeks later. The Society is incorporated to render service in all parts of Canada but for the present is functioning only in Ontario.

The Board of Directors appointed the following officers: President—L. M. Wood, Secretary-Treasurer—A. B. Stodart, Placement Director—E. B. Lally, B.A., Medical Consultant—Dr. G. A. Fee.

Mr. Lally, who had been a teacher at the Ontario School for the Deaf for more than twenty years, began his new duties on August 1st, 1940. He has been successful in finding employment for many of the recent graduates of the school. It is expected that this Society will be able to render great assistance to deaf boys and girls after they leave school.

Teaching Staff

When Mr. Lally left his work at the school to become Placement Director of the National Society, his place as Director of Vocational Guidance and Instructor in Business was taken by Mr. F. P. Cunningham, B.A., formerly teacher of language in the senior department. To succeed Mr. Cunningham, Miss Maloney, teacher of girls' physical training, was transferred to the senior department as teacher of language. Miss Evelyn Watt, a successful teacher in Pembroke public schools, was engaged to teach girls' physical training.

Miss Flora Bell resigned to be married and was succeeded by Miss Patricia Stafford, who was transferred from the Ottawa Model School.

American Association to Promote the Teaching of Speech to the Deaf

The fiftieth anniversary of the Association was held in Providence, Rhode Island, from June 17th to June 21st. Thirteen of our teachers accompanied by Miss C. Ford, Directress of Professional Training, attended this meeting of the Association.

School Calendar

On Friday of Easter week a group of junior children participated in a programme at the Spring Festival in St. Michael's Academy.

Junior and intermediate pupils took a prominent part in the concert which opened the Y.M.C.A. war services campaign.

A group of older senior pupils appeared on the programme of the Leap Year Cabaret put on by the Young People's Union of Bridge Street Church.

Thursday, April 25th—Boys' banquet.

Thursday, May 2nd—Girls' banquet.

On Monday evening, May 13th, pupils presented a concert in the Town Hall, Napanee, under the auspices of the Salvation Army.

On Thursday afternoon, June 6th, many guests visited the junior classrooms to observe the work of the pupils in speech, lip-reading and language.

Afternoon tea was served and articles made by pupils in the sewing room were sold, the proceeds being donated to the Pupils' Benefit Fund. In the evening a display of work of pupils in vocational classes was on exhibition in the assembly room. The public were entertained by the pupils in rhythm exercises of all kinds.

On Monday, June 10th, closing exercises were held and prizes, diplomas, and certificates awarded to the pupils.

Thursday, December 5th—School bazaar.

Monday, December 16th—Christmas Nativity Pageant.

Admission and Graduation

This school has been in operation for seventy years, having been opened on October 20th, 1871. Thirty years later, in 1901, the Literary Examiner made the following statement in his annual report,—“It would appear that the average age at which the pupils have been admitted is about 9½ years, but it will be seen that many come at ages ranging from 15 to 20. Under such conditions the best results cannot be attained, nor can very rapid progress be anticipated.”

In 1905, Mr. Brown, Inspector of Public Schools, Morrisburg, was Literary Examiner. He reported as follows,—“The primary, in fact almost the sole object, with juniors, is not to give instruction, but to construct, practically to create, a medium of communication between the children and the outer world—to furnish them with language, sign language, both natural and arbitrary.” The ages of the pupils at that time were:—

10 years and under.....	61	16 to 18 years.....	58
11 to 12 years.....	26	19 to 21 "	33
13 to 15 "	71	21 to 29 "	30

These figures are very significant.

Mr. Mathison was opposed to the admission of young children. In one of his reports he stated,—“The minds of the young children do not seem capable of grasping ideas, and for two or three years they are taught only the alphabet, and the names of a few objects which could be taught them in their own home. The children who come when about 9 or 10 years of age take up the work much more readily and are as far advanced at the end of one year as the younger ones who have spent two or three years here ”

Mr. Mathison resigned as Superintendent in 1906 and was succeeded by Dr. Coughlin.

Normal deaf children are admitted now at 5 years of age. After two or three years in school these young children are able to think in words. By the time they are ten years old they have acquired a knowledge of printed books, written language, speech and lip-reading, thought impossible of attainment thirty-five years ago. Early age of admission, better organization and more scientific teaching methods are responsible for this improvement. This also accounts for the fact that the children complete their education when they are very young, at present less than 15% are over sixteen years of age, compared with 43% over sixteen years of age in 1905, with thirty of these being men and women 21 years of age or older.

Seven boys and three girls completed the work of Grade VIII in June and were awarded High School Entrance certificates. Six of these pupils returned to school in September to study in the high school class. Although this school was opened in 1870 it was not until June, 1914, or eight years after Dr. Coughlin had become Superintendent, that the first pupils received High School Entrance certificates. In that year the class consisted of eight girls. Year after year since that time from eight to fifteen pupils have attained this standard. At present pupils who complete the work of Grade VIII may continue in school for two years to take secondary school and vocational work.

Report of Dentist

The following work has been completed during the school term:—

Girls: Fillings, (a) Amalgam 98, (b) Porcelain 18; Prophylaxis 35; Extractions, (a) Permanent 5, (b) Deciduous 41.

Boys: Fillings, (a) Amalgam 92, (b) Porcelain 22; Prophylaxis 42; Extractions, (a) Permanent 7, (b) Deciduous 46.

G. C. Caldwell,
Dentist.

Report of School Physician

The following is a report on the admissions to the hospital of the Ontario School for the Deaf, Belleville, from April 1st, 1940, to March 31st, 1941:—

One appendectomy; Measles, 29 cases; German measles, 53 cases; several cases of impetigo; one case of nephritis; six children taken to Provincial Chest-Clinic. New pupils given scarlet fever toxin, 41; new pupils given diphtheria toxoid, 32; new pupils vaccinated, 34.

All of the personnel who had not had scarlet fever toxin or diphtheria toxoid were immunized.

R. W. TENNENT,
Physician.

Our Graduates in Universities

Louise Cowan, of Princeton, Ont., on a scholarship from the Ontario School for the Blind, has completed her second year at McMaster University.

John Green, B.A., Saskatoon, Sask., pursued Post-graduate work at Saskatchewan University on a scholarship won during his B.A. course in the same college.

Oliver Bell, Edmonton, Alta., successfully completed his second year at the University of Alberta.

War Work

During the year both staff and students of the Ontario School for the Blind have endeavoured to do their share in the great task which challenges us all.

Our Physical Instructor has given two nights a week to the drilling of N.P.A.M. officers in the Dufferin and Haldimand Regiment. Seven of our lady teachers have taken complete courses in A.R.P. and St. John's Ambulance work. The lady teachers and girl students in our sewing and knitting departments have furnished the Red Cross with numerous articles for our soldiers and for British war victims.

The whole school joined in raising money for Red Cross and British Relief work. The following contributions were made during the year:

The whole school to the Lord Mayor's Fund.....	\$70.00
Merry Makers' Club (Senior Girls).....	3.00
Senior Boys' Club.....	24.92
Guides and Brownies.....	17.74
Junior Red Cross.....	54.00

Our annual athletic meet with the Batavia (New York) School for the Blind was held at Brantford on May 30th. Each school entered a team of eight boys. The Ontario School for the Blind won four out of five events and was declared the champion for 1941.

At the Stratford Musical Festival held in April, our students again made a very creditable showing. For the fourth consecutive year we won the Stratford

Beacon-Herald Trophy for madrigal choirs. The first three wins gave us one trophy permanently, and this year we are the holders of a new trophy given by the Stratford Beacon-Herald. For the third consecutive year we have won the MacLaglan Trophy for Ladies' small choirs, which makes us the permanent owners of this trophy. For the second consecutive year we have won the Pounder Brothers' Trophy for male choruses. In addition to the above we won the following medal awards.:

Ladies' single trio (under 21 years)...	Silver medal—2nd place
Ladies' double trio.....	Silver medal—2nd place
Ladies' Trio (Open).....	Gold medal—1st place
Mixed Quartette.....	Gold medal—1st place
Baritone Solo (Open)—Everett Rush.	Gold medal—1st place
Coalhurst, Alta.	

Staff Changes

At the beginning of the year, the Education Department called Mr. A. M. McNamara, to Inspector's duties at North Bay. Mr. McNamara had been with us five years. He endeared himself to both students and staff, and our best wishes go with him in his new work. Mr. Joseph Hyde of Toronto was appointed to fill the vacancy thus created.

Mr. Ralph Brown, Boys' Supervisor, resigned at the beginning of the school year to join the C.A.S.F. Mr. Brown had given good leadership to our boys for five years. We wish him well in his service to King and Empire. Mr. Douglas Coutts was appointed to replace him.

Library Report

During the winter of 1940-41 we added about 100 volumes to our library. A considerable number of these were juvenile books, which were badly needed, as our younger readers are very enthusiastic patrons. They are encouraged to begin outside reading when they reach Grade II.

Eight years ago our library consisted of less than 100 volumes. Today, we have about 1000 volumes, the majority of which are juvenile and senior fiction, with a goodly portion of reference books. We have also biographical works, and a number of the books of the Old and New Testaments.

Medical Report

Total number of hospital days.....	1,301

Appendectomy.....	1
Miscellaneous cases.....	11

Following our usual procedure, each student was given a thorough physical examination, and new students were given diphtheria toxoid and vaccinated if necessary.

A vigorous physical programme of sports and outdoor life, the development of a nearly normal outlook on life mentally, and the care and aids made available to these young folk in a medical way, have produced a sturdy and healthy body of students.

All of which I am pleased to submit.

(Signed) J. A. MARQUIS,
Physician.

Report of Oculist

The examination was carried out at the school during the fall months. It included a complete ocular examination of the 32 new pupils of this year's class, and a re-examination of 134 pupils previously admitted.

It is very gratifying to note in the appended chart that this year's class has considerably more sight than is usually found in new pupils presenting themselves at the school. In the first group, those who have limited vision in both eyes, are fifteen pupils, or almost 50%. Some have sufficiently good distant vision to enable them to go about readily, but because of limited near-vision they are precluded from obtaining an education visually.

Condition of Sight	Male	Female	Total
1. Limited vision in both eyes.....	8	7	15
2. Limited vision in one eye.....	3	3	6
3. Quantitative light perception in both eyes.....	1	2	3
4. Quantitative perception in one eye, none in the other....	3	1	4
5. Without light perception in either eye.....	3	1	4
Totals.....	18	14	32

The next chart presents a comprehensive outline of those eye diseases which are accountable for the impairment of sight and for blindness in this year's class.

Diseases Causing Blindness	Male	Female	Total
1. Ophthalmia Neonatorum and Keratitis.....	1	2	3
2. Congenital Cataract.....	6	4	10
3. Myopia.....	3	2	5
4. Optic Atrophy.....	4	1	5
5. Glioma of Retina.....	1	1	2
6. Congenital Buphthalmus and Congenital Malformation..	1	2	3
7. Fundus Lesions, Diseases of the Retina and Choroid....	1	1
8. Sympathetic Ophthalmia, Plastic Uveitis.....	1	1
9. Traumatic Lesions, Detachment of Retina and Haemor- rhage.....	1	1
Totals.....	18	14	32

From a study of the foregoing chart, we find that the aetiological factors producing blindness resemble very closely those found in former examinations. There is about the same number of congenital cases, the same number of traumatic origin, and the eye diseases themselves show a distinct similarity with the

possible exception of congenital cataract. Here we find a distinct increase, ten such cases being found in this class against six last year.

Conversely, we find a decided reduction in those cases classified as fundus lesions, including diseases of the retina and choroid. We have only one in this class, whereas last year the number was eight. Ophthalmia Neonatorum and Keratitis cases are the same as last year, four in number. Optic Atrophy is the same with five cases. Myopia, five cases as against four last year. One new condition not met with for some two or three years is Glioma of the Retina, and two cases of this disease are found.

We re-examined all the other pupils at the school and felt very pleased to see the improvement that so many of them had made, both from an ocular and a physical point of view. I feel that much of this improvement is due to the excellent attention given to the pupils by the school staff throughout the year. As usual, it was necessary to advise many of the pupils as to the amount and type of use they could give their eyes. Some needed new glasses and a few received glasses who had not previously worn them. Again, we pointed out the value of proper diet, especially the use of those vitamins so beneficial in eye diseases.

All of which is respectfully submitted.

NORMAN W. BRAGG, M.D., F.A.C.S.

Report of School Dentist

All the pupils presented themselves for dental examination. Twenty-six per cent. had kept their teeth in first class condition, as many more in very good condition. The rest ranged from fair to a few cases of neglect.

A large proportion of the work, especially extraction, was for new pupils.

	Boys	Girls
Extracting, Permanent.....	7	15
" Deciduous.....	20	23
No fillings.....	29	18

C. N. I. B.

In conclusion, I wish to express on behalf of myself, staff and students our appreciation of the service given to our graduates by the Canadian National Institute for the Blind. They continue to place our graduates in employment. I am assured all our last year's graduates will be employed by the beginning of the new school term.

The teaching staff have served faithfully, cheerfully and well; the house staff have given efficient service.

Respectfully submitted,

H. J. VALLENTYNE,
Superintendent.

Brantford, Ont., June 25th, 1941.

APPENDIX K

REPORT OF THE ACTING INSPECTOR OF PUBLIC LIBRARIES

To the Honourable Duncan McArthur, M.A., LL.D.

I have the honour to submit the following report of the Public Libraries Branch for the year 1940, including statistics for public libraries in 1939 and a statement of the Legislative Grants paid in 1940.

The Inspector of Public Libraries, Major Angus Mowat, was called for Active Service towards the end of June, 1940, and since then his duties have been carried on as fully as possible by the Acting Inspector and the other members of the Staff.

1. Public Libraries of the Province

The number of Free and Association libraries in 1940 was 502. Of these 231 were Free and 271 Association. The sum of \$41,225.25 was paid in Legislative Grants, which is approximately $3\frac{1}{4}\%$ of the total expenditure of these libraries in 1939. The grants varied from \$4.00 to \$2,579.90, the latter amount being paid to the Toronto Public Library.

Municipal appropriations for the Free libraries in 1939 was \$1,050,178.89, and the total amount expended on books by the Free and Association libraries in that year was \$266,617.37.

The total expenditures on libraries in 1939 was \$1,337,099.25. The population served by the Free libraries was 2,057,359, and the approximate population served by the Association libraries was 212,476, making a total of 2,269,835 persons to whom library service was available.

Borrowers to the number of 676,508 were registered in the libraries, and the number of volumes was 3,438,524.

The total circulation of books in the province was 13,973,267, or 3.72 books per capita.

2. The Travelling Libraries

A summary of the service given by the Travelling Libraries is as follows:

Libraries loaned in 1940—

To Public Libraries.....	226	
To Schools.....	729	
To Women's Institutes.....	75	
To Study Clubs, etc.....	97	
		<hr/>
Total.....		1,127
Increase in 1940.....		125

Book Circulation, 1940—

Boys' and Girls'	86,162
Classed Books	17,346
Fiction	29,957
<hr/>	
Total	133,465
Increase in 1940	20,977

Books purchased, 1940—

Boys' and Girls'	1,592
Classed Books	1,062
Fiction	1,187
<hr/>	
Total	3,841

Books withdrawn, 1940 1,671

Total number of books in the Travelling Libraries,
1940 35,502

There is a steady increase in the use of the Travelling Libraries, especially by the schools. Public Libraries, Women's Institutes, Study Clubs, etc. are reading more non-fiction books and less fiction.

Travelling Libraries have been loaned to the following Military units:

Military Training Camp Newmarket.

Camp X, Angler, Internment Camp For use of Canadian Officers in charge.

Camp M, New Toronto, Internment Camp.. For Canadian Officers in charge.

Camp Borden Canadian Grenadier Guards.

The Teachers' Library continues to show an increase in circulation and in the number of borrowers. The number of teachers registered is 1,359; the number of volumes in the library is 982; there were 7 new titles added in 1940; and the circulation was 2,566 volumes. This is the largest circulation since the library was organized in 1938.

3. Book Donations

During the year a large number of used books were sent to Camp Borden, Newmarket Camp, and Frontier College. All the books were in good condition, and letters of appreciation have been received.

4. Libraries Not Reporting

In 1940 fifteen Association Libraries failed to report for the previous year. Some of these are in very poor condition, and official reports have not been received for some years. Under the Public Libraries Act, if a report is not received for two consecutive years, the library may be removed from the list and the books disposed of as the Minister may deem proper.

5. County Libraries

The war condition, which has increased the demand for recently published books, seems to be drawing the libraries in the counties and districts closer together for co-operative work. To the County Library Associations already established there were added in 1940 the Counties of Simcoe and Essex. The Government is very sympathetic to these organizations, and Legislative Grants

Bloomfield Public Library

up to a maximum of six hundred dollars have been given where the County Council gave a like amount. Smaller grants are allowed for organization purposes and on book purchases.

It was stated in a report some time ago that "The demand for library service keeps pace with the provision for serving the people. The larger or better service on the part of the library always meets with response from the people." This seems to be the reason that County Libraries are progressing.

6. The Ontario Library Review

The *Ontario Library Review and Periodical Index* is published quarterly, and the circulation is steadily increasing. Our mailing list now includes addresses in Canada, the United States, the British Isles, Australia, Tasmania, New Zealand, South Africa, India, China, the Philippine Islands and the British West Indies. The book lists in it are valuable, the articles interesting, and there is a growing demand for bound copies of the Periodical Index.

7. Change in Status of Libraries

Four Association libraries were added to the list in 1940. They are Blackwell, Corunna, Delora and Flinton. The Association Library at Brown's Corners was closed.

One Free Public Library was added in 1940, that at Exhibition Park, for use of the men in Camp. This is a Branch of the Toronto Public Library System.

The appended statistical tables are for the year 1939 and show the Legislative Grants paid in 1940.

I have the honour to be, Sir,

Your obedient servant,

S. B. HERBERT,

Acting Inspector of Public Libraries.

February 10th, 1941.

APPENDIX L

REPORT OF THE PROVINCIAL SUPERVISOR OF MUSIC

During 1940, Music has continued to spread throughout the schools of the Province. Statistics attached to this report show that on June 30th, 12,344 or 71% of the Public and Separate School classrooms were receiving regular Music instruction under the supervision of qualified teachers. This represents an increase of 587 rooms over last year. Many other rooms participate in singing under the leadership of their own teachers. Two hundred and ninety-two secondary schools provided a course in Music, an increase of 31 over last year. Four additional secondary schools provided a course in Music but failed to qualify for special grants.

Music festivals have been held in many parts of the Province, the approximate number being as follows: Competitive, 33; Non-competitive, 20; Combined Concerts, 68; Total, 121. These festivals have greatly stimulated the Music in the schools and have given the public an opportunity to judge the progress of Music through the performance of the children.

The Department again gave active support to the Ontario Educational Association in presenting an evening concert at Massey Hall, Toronto, on the Friday after Easter. The programme was supplied by the Ontario secondary school orchestra under Leslie R. Bell, M.A., Toronto; the Ontario secondary school choir under Donald Wright, B.A., London; and the Ontario elementary school choir under George Smale, Brantford. Approximately 500 children from all parts of the Province participated.

The Summer Courses in Music at Toronto and London offered 9 regular courses, with an attendance as noted below:—

Year	Toronto	London	Total
1935.....	264	145	409
1936.....	362	191	553
1937.....	481	238	719
1938.....	614	356	970
1939.....	597	413	1,010
1940.....	554	342	896

The reduced enrolment in 1940 may be attributed to the fact that the need for new teachers is not so great as formerly. The outbreak of War and the discontinuing of special Music Grants to teachers also contributed to this result.

During the year the following literature was prepared and distributed:—

School Music Festivals.

Suggested Festival Songs.

Advice for Contestants.

List of Books on Music Appreciation.

Detailed Syllabus of the London Summer School.
 Supervisors' Agreement Forms.
 Music in Rural Schools (revised).
 Syllabus of the Summer Courses (revised).
 Special Departmental Grants (revised).

Statistics.—The following statistical information concerns the school year ending June 30th, 1940, and includes only those schools earning special grants for the teaching of Music. Many others make provision for Music, but are not at present qualifying for the grant.

In some parts of the Province changes in boundaries of inspectorates during the past few years make it difficult to show by comparative figures the development of Music in those areas.

Respectfully submitted,

G. R. FENWICK,

Provincial Supervisor of Music.

Toronto, February 15th, 1941.

APPENDIX M

REPORT OF THE REGISTRAR OF TRADE SCHOOLS

TO THE HONOURABLE DR. DUNCAN MCARTHUR,
Minister of Education, Province of Ontario.

DEAR SIR:

I beg leave to present to you the report of the operations of the Trade-Schools Regulation Act for the year 1940-41.

This Act has now been in force since January 2nd, 1939, and its enforcement continues to be a very distinct service to this Province. Through guidance furnished under this Act many thousands of dollars of investment of our citizens have been saved or recovered. Undesirable practices on the part of some trade school officials, which were not uncommon in the Province before this Act was in operation, have vanished, and it is now only occasionally that the attention of a registered school has to be called to operations not in harmony with present Departmental requirements. Registered schools now freely discuss contemplated changes with this Department, and in this way many difficulties are avoided. Such consultation is also of much value to the management of a school in assisting it to improve the content of the courses offered as well as to raise the educational value of such courses for those who undertake them. Much improvement is now noted in the character of the courses and the manner in which they fit into the requirements of the industrial life of the community. This has been very noticeable in the case of courses which train students for some type of war work. Many of the Trade Schools are rendering valuable assistance in furthering the war effort of this country. The student registration of such schools has been large during this war period, and the fact that hundreds have been enabled to take positions in war work industries has fully justified the expenses involved in taking the courses. The placement problem was a difficult one during the period of depression but this has largely disappeared with the present advance in industrial activity.

In the administration of the Act it has been found necessary to have certain amendments to it passed by the Legislature, and some changes made in the Regulations by Order-in-Council. The penalties as given in the original Act were found to be inadequate to give sufficient control and had to be materially increased. The original Act did not specify any penalty for an agent or salesman who misrepresented matters in the course of his sales efforts. As many of the troubles originated with the salesman it became necessary to amend the Act accordingly.

The Act gives power to the Lieutenant-Governor-in-Council to designate any occupation, calling or vocation as a trade within the meaning of this Act.

It is consequently necessary to expand the list of trades involved, from time to time, as wider control is deemed necessary. The list of trades now under control, is as follows:—

- | | |
|--|---|
| 1. Advertising | 17. Internal Combustion Engines |
| 2. Air Conditioning and Refrigeration | 18. Journalism and Story Writing |
| 3. Airplane construction, repair and Operation | 19. Landscape Gardening |
| 4. Broadcasting Practice | 20. Machine Shop Practice |
| 5. Business and Office Practice by Correspondence | 21. Mechanical Dentistry |
| 6. Civil Service Occupations | 22. Painting and Interior Decoration |
| 7. Commercial and Industrial Art | 23. Photography |
| 8. Dairy, Poultry and Other Farm Work | 24. Printing and Bookbinding |
| 9. Detective and Secret Service Work | 25. Pulp and Paper Making |
| 10. Diamond Drilling | 26. Radio and Wireless Communication |
| 11. Dress and Garment Designing including Millinery | 27. Sound Projection and Motion Picture Operation |
| 12. Electric and Acetylene Welding | 28. Speech and Oratory |
| 13. Foot Correction | 29. Salesmanship |
| 14. Hand, Machine and Power Machine Sewing Operation | 30. Sheet Metal Work |
| 15. Hotel Management and Other Hotel, Cafe and Hostess Occupations | 31. Steam Engines and Boilers |
| 16. Industrial and Business Management | 32. Television |
| | 33. Theoretical and Industrial Chemistry |
| | 34. Theoretical and Industrial Electricity |
| | 35. Theoretical and Practical Engineering |
| | 36. Woodworking and Cabinet Making |

The list of registered schools has increased since the last report. Some schools previously given registration have ceased operations in Ontario either because of refusal by this Department to continue the registration or because of voluntary withdrawal. The operation, in Canada, of the school with headquarters in the United States, has become increasingly difficult since the outbreak of war, and more particularly so with the additional restrictions of the Foreign Exchange Control Board.

The following is a synopsis of matters which regularly require the attention of the Department:—

1. Inspection of Registered Schools, and of those seeking registration, to determine if requirements of the Act and the Regulations are being followed. In some cases the Certificate of Registration has to be cancelled.

2. Consideration of proposed changes in teaching staffs—the approval of the Department must be secured before any change is made.

3. Reading and approving advertising manuscript and radio script before it is allowed to be published; checking advertising which has not been submitted for approval.

4. Consultation with and guidance of students who are having difficulty with schools, or of school managers who are having difficulty with students.

5. Co-operation with Better Business Bureaus and other organizations in settling problems in connection with alleged unethical operations of schools which they may bring to our attention.

6. Checking the activities of agents or salesmen who, from reports received, appear to be acting at variance with the Act. In some cases it may be necessary to cancel the Departmental Registration Certificate of such salesmen.

7. Answering enquiries regarding the status of schools, and guiding students in the selection of suitable courses of study.

8. Dealing with applications of students to attend schools in the United States, as required by the Foreign Exchange Control Board.

9. Consultation with persons desiring to establish Trade Schools, and guidance as to the method of procedure; passing on the content of courses to be offered.

10. Correspondence, or interviews, with representatives from similar Departments in other Provinces, or in other countries, who seek information regarding our method of handling various problems of administration.

Since the coming into force of the Trade-Schools Regulation Act there has been a marked improvement in the courses of study offered, as already noted, and also in the methods of operation of the registered group of Trade Schools. The school management, in most cases, values the holding of a Certificate of Registration so highly that full co-operation is offered in meeting the requirements of the Act and Regulations by improvements in staff, courses, equipment, accommodations, etc., etc.,—and in building up a most cordial relationship with the student body. In short, the management makes every endeavour to bring the school to such a status that we have no hesitancy in recommending its courses to inquirers communicating with this Department.

W. S. KIRKLAND

Registrar of Trade Schools.

Toronto, November 8th, 1941.

PART II

STATISTICS

of

The Provincially-Controlled
Schools of Ontario

TERMINOLOGY

Assessment—The valuation placed upon property for tax levy purposes. The County Council generally makes an equalization annually of local assessment figures, and this equalized figure is used in the computation of Legislative grants to schools.

Attendance Efficiency—The percentage relation of the actual days attended to the perfect aggregate.

Auxiliary Classes—These are provided for gifted, socially or educationally maladjusted, retarded, or physically-handicapped pupils.

Capital Charges—Debenture instalments, or sinking fund deposits, made on debt incurred for school buildings and equipment.

Compulsory School Age—Children 8 to 14 must attend full time; children from 5 to 8, if enrolled, must attend full time to the end of the school term for which they are enrolled. Adolescents, 14 to 16, who have not attained University matriculation standing must attend full time; those exempted on the plea of circumstances compelling them to go to work must attend part time (400 hours a year) in municipalities where part-time courses are provided. Urban municipalities with a population of 5,000 and over, are required to provide part-time courses.

Consolidated School—An amalgamation of two or more rural schools, or of rural schools with a village or town school, either for the purpose of strengthening the means of school support where the original schools were small or poor, or for the purpose of providing a graded school and other advantages, such as conveyance, instead of the original one-room school.

Correspondence Courses—Reach those more isolated than the school car pupils. They supplement the work of the regular school when remoteness, winter weather, ill-health, or physical disability prevent regular attendance. Twenty-five hundred is an approximate year's enrolment for these courses, which reach from Grade I to X, and are sets of carefully prepared lessons based on the new Course of Studies. A Departmental staff handles this correspondence with extreme promptness, and a pupil's progress depends entirely upon his own efforts. About 80% of these pupils live in Northern Ontario, and half of them are of foreign parentage. These courses are entirely free.

Cost per Pupil-Day—The cost of educating one pupil of actual attendance, for one day. It is found by dividing the total cost of education of the group of pupils concerned by the actual aggregate attendance of this group for the period under consideration.

County Pupil—A secondary school pupil living within the County but outside any secondary school district.

District—The eleven defined areas of Northern Ontario which do not constitute municipal units for any purpose. With the exception of Parry Sound and Muskoka, these areas lie north of the French River and Lake Nipissing. This region is newer and more sparsely populated than Southern Ontario, and produces most of Ontario's extensive mineral and forest wealth.

Enrolment—The number recorded on the school register as in active attendance. The school census for the Province is now taken annually on the last school day in May.

Fifth Classes—Grades IX and X in Elementary Schools, doing work similar to the first two grades of Secondary Schools. The majority of these classes are in rural areas.

Free School Age—The Public Elementary Schools are free to all resident pupils between the ages of 5 and 21 whose parents are public school supporters. The Separate Schools are free to the children of the separate school supporters. The Secondary Schools are free to all except non-resident pupils.

General Maintenance—Ordinary, current expense, as opposed to capital outlays and debenture charges.

Inspectorate—The area under the supervision of a local Departmental representative.

Kindergarten Primary—A class combining the work of the kindergarten and Grade I.

Non-Resident Pupil—A secondary school pupil who is neither a resident nor a County pupil.

Public School Section—Is a subdivision of a township for elementary school purposes, containing a minimum of 50 children between the ages of 5 and 21, and having a maximum area of four square miles.

Resident Pupil—A secondary school pupil living within the secondary school district.

School—Provincially controlled schools may be classified as:

I. **Elementary**—Those doing the work of the first eight grades. A few have Fifth Classes (see above).

- (a) **Public**—The first school established in any school section or urban municipality, and supported by the ratepayers.
- (b) **R.C. Separate**—For the children of Roman Catholics.
- (c) **Protestant Separate**—For the children of Protestants in centres preponderantly Roman Catholic.

II. **Secondary**—Those doing the work of Grades IX to University Matriculation.

(a) **Academic:**

- 1. **Collegiate Institutes.**
- 2. **High Schools.**
- 3. **Continuation Schools.**

These schools are differentiated by minimum staff requirements. Continuation Schools are located mostly in villages or rural areas. Academic Courses are designed to lead to Universities and Teacher-Training Schools.

(b) **Vocational:**

- 1. **Technical High School.**
- 2. **Commercial High School.**

In the smaller centres academic and vocational departments are frequently found in the one building, which is then called a composite school. Vocational courses are designed to lead to industry, trade and commerce.

School Car—A school on wheels, carrying education and social betterment to small communities scattered along the railway lines of Northern Ontario. There are 7 of these cars at present, each with a definite route of about 175 miles, which is covered in a month or six weeks. Each stop is from 4 to 6 days. Problems are solved, work is outlined and assigned. Parents come to night classes, where English, spelling, writing and arithmetic are taught them, and where daily problems of life are discussed. Ninety per cent of the pupils are non-English speaking. The Department supplies all school needs free. The enrolment is about 275.

School Year—The school year consists of two terms, September 1 to December 22, and January 3 to June 30. In addition to the intervals between these terms there is a vacation of one week following Easter. In this Report statistics cover the school year where possible. Financial data remains on the calendar year basis.

Secondary School District—Is the area over which the secondary school board exercises supervision. Each city and separated town is a secondary school district. The County Council may establish a secondary school district composed of an urban municipality only, a group of school sections only, or a combination of both. In the territorial districts of Northern Ontario any municipal council or councils may establish the whole or any part of the municipality or municipalities as a secondary school district, with the approval of the Minister of Education.

(d) Other sources.....	117	4.4	565	2.6	312	1.8	994	2.6
Totals.....	2,670	100.0	22,091	100.0	17,721	100.0	42,482	100.0
2. Transfers to another secondary school in another municipality.....	205	1,169	N.R.
3. Retirements (excluding Middle and Upper School graduates) during the year from:								
(a) Grade IX.....	287	8.6	2,224	9.9	2,387	20.0	4,898	13.0
(b) Grade X.....	204	7.7	1,686	9.8	2,592	24.6	4,482	14.8
(c) Grade XI.....	169	8.5	1,658	11.8	2,334	34.6	4,261	18.1
(d) Grade XII.....	128	7.7	1,031	9.4	2,176	68.7	3,335	21.1
(e) Grade XIII.....	40	10.4	680	8.7	360	51.3	1,080	12.1
(f) Special.....					831	40.5	831	40.5
Totals.....	828	8.2	7,379	10.1	10,680	29.8	18,887	15.9

A—Not included in the percentage figure since these pupils are more in the nature of transfers, considering the secondary schools as a group.

N.R.—Not recorded.

NOTE:—Per cent. under Retirements in the secondary schools, is the percentage of the May Enrolment of the year concerned. The actual per cent. of the particular year who retired will be slightly lower than the figure given.

II—DESTINATIONS AND OCCUPATIONS OF EX-PUPILS

Those who left during or at the end of the school year 1939-40 as reported in December 1940

[illegible]

A. Information on these classes will not be available till 1940-41.

a. Of all pupils leaving student life from Elementary Schools, 53% left without obtaining High School Entrance standing. Percentages less than one tenth of one percent are not shown.

Main classes are expressed as a percentage of G

NUMBER OF SCHOOL BOARDS IN THE PROVINCE, JUNE 1941

A Includes extra-mural Students.

B 52 of these previously held District Certificates.

c Located at Hamilton, London, North Bay, Ottawa, Peterborough, Stratford and Toronto.

D Discontinued.

VI. DEPARTMENTAL SUMMER COURSES

ENROLMENT BY SUBJECTS IN RECENT YEARS

(The Summer Courses are conducted by the Department of Education for the benefit of Teachers, who desire to spend a part of their summer vacation in an effort to improve their academic and professional standing, and thus to become more efficient in carrying on with a modernized curriculum.)

Decrease for the year...	12,039	2,286	14,325				2.6	1.6	2.5			

Enrolment decrease is general. A falling birth rate in the post-war depression period is now showing up in a decreased school enrolment. This is the first year it is really noticeable.

Average Attendance shows a comparatively small decrease in comparison to enrolment, due to two main causes (a) Average attendance of preceding year was lessened by poliomyelitis epidemic, (b) the Royal Visit.

Ambulance presented by pupils of York 6 to Canadian Army Medical Corps

Funds were raised by school concerts, salvage sales, and other student enterprises. The above picture shows Inspector R. A. Johnston and a few of his helpers.

*Special Certificates are listed only where teacher devotes whole time to that subject.
†Music Teachers, in the case of rural schools, are listed by County of domicile. The majority of these are not holders of Departmental certificates. They supervise Music in Town and Village schools also.

COUNTIES—Group A—Towns with population over 6,000.
 " B— " " " " 4,000 and under 6,000.
 " C— " " " " 2,000 " " 4,000.
 " D— " " " " under 2,000.

DISTRICTS—Group A—Towns with population over 10,000.
 " B— " " " " 2,000 and under 10,000.
 " C— " " " " 1,000 " " 2,000.
 " D— " " " " under 1,000.

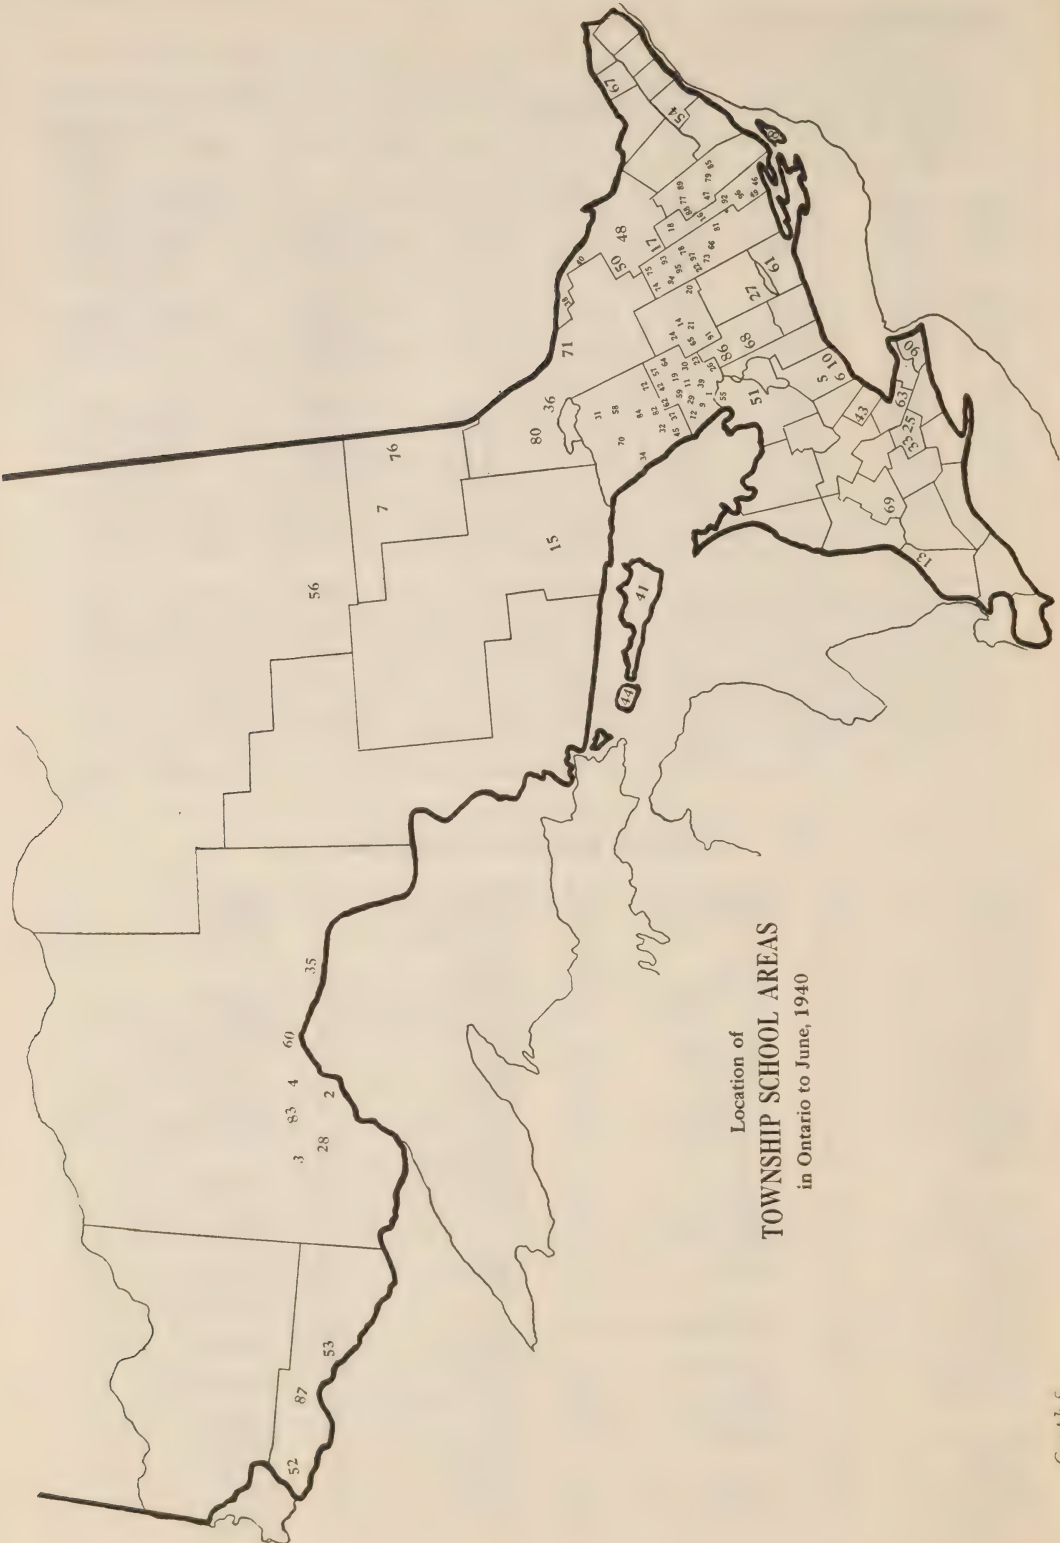

- A Ordinary schools limited to those with less than 6 teachers.
 B Local assessment for the Districts (and all municipalities therein), all Cities, and the seven separated towns—Equalized assessment in all other cases.
 C Average Daily Attendance for the calendar year.
 D In Default.
 E Includes Debenture levy.
 F General Maintenance.
 G Payments on debentures or into sinking fund.
 H Including arrears, but excluding sinking fund.
 I New schools opened in the fall of 1938.
 J Total debt against total assessment.
 K Exclusive of those in default.
 L Includes \$5,549 annual instalment on school purchased from Collegiate Institute.
 M Gross.
 N Paid on assumption from Saltfleet Township.
 P No payment. Debenture just issued.
 Q Includes Continuation School.
 R In the case of the Districts, the Province pays the equivalent of the County Grant. This is included in the Legislative Grant figure.
 S Approximate. Exact figures not available due to refinancing.
 T Includes section, township, and county levies.
 NOTE: In calculating group averages, the totals in each group are used as the bases.

A Average Daily Attendance for calendar year.

B Includes levy for debenture payments.

C Payments on debenture debt.

D In default.

E In some cases this may include Public School.

F Community donations.

† Debts sold in 1939 no payment till 1940.

G The larger part of the increase of this figure over 1938 is due to more complete reporting. The amount recorded as sold during the year was \$35,238.01.

Amateur Theatricals

TABLE 36—NIGHT SCHOOLS—Classification of Pupils by Subjects of Study, 1940-41

I. ACADEMIC

A—CULTURAL

1. English for New Canadians.....	182	6. Public Speaking.....	95
2. Reading.....	242	7. French.....	228
3. Literature.....	200	8. German.....	16
4. Composition and Spelling.....	501	9. Vocal Music.....	11
5. Grammar.....	340	10. Dramatic Art.....	23

B—PRACTICAL

1. Arithmetic.....	734	4. Trigonometry.....	169
2. Algebra.....	350	5. Mensuration.....	72
3. Geometry.....	282	6. Shop Mathematics.....	1,125

II. VOCATIONAL AND INDUSTRIAL

A—DOMESTIC ARTS

1. Cooking.....	1,587	6. Sewing and Dressmaking.....	3,491
2. Hygiene and Dietetics.....	273	7. Millinery.....	267
3. Home Nursing.....	344	8. Textiles.....	47
4. Home Economics.....	149	9. Embroidery and Lace Making.....	17
5. Drafting and Design (Clothing).....	9	10. Period Furniture.....	19

B—COMMERCE

1. Stenography.....	4,359	8. Filing.....	146
2. Typewriting.....	5,132	9. Office Routine.....	104
3. Business English.....	198	10. Book-keeping.....	1,885
4. Journalism.....	29	11. Advertising.....	104
5. Rapid Calculation.....	28	12. Salesmanship.....	59
6. Business Machines.....	691	13. Commercial Law.....	27
7. Business Forms.....	182	14. Dictaphone Transcription.....	168

C—ART, DRAFTING AND DESIGN

(a) Pure Art:		5. Anatomy.....	49
